Zhone Technologies, Inc.

Annual Report 2007

Access for a Converging World

Fellow Shareholders:

The past year has been a season of exciting changes for Zhone. Telecommunications operator interest in the multi-service access network equipment we've pioneered has accelerated significantly, as carriers move more quickly to transition to converged IP networks, adopt new fiber- and copper-based access technologies to meet demands for higher data rates, and diversify their service portfolios. Our foundation work over the past few years on core technologies and products—including a number of key additions in the past year—has built us the industry's broadest portfolio of truly integrated multi-service access solutions. Accelerating demand, our product strengths, and aggressive execution by the entire Zhone team has given us traction with a new class of customers whose large-scale network deployment plans represent a tremendous launching pad for Zhone's continued success.

Our work and achievements in 2007 were all about refining our focus on these growth opportunities in multi-service access—our target market segment since inception. Highlights include:

- ▶ Achievement of a top-4 global market share position in the multi-service access platform category, with a clear #1 rank in the Caribbean and Latin American market*
- ▶ Successful launch of our Gigabit Passive Optical Network (GPON) solution and key extensions to our Ethernet in the First Mile (EFM) product portfolio, strengthening our integrated product portfolio lead
- ▶ A steady stream of new customer wins, from small independent telcos to thriving competitive local exchange carriers in the US, budding alternative carriers in Europe, and aggressive national incumbent carriers in several markets outside the US
- ▶ Installation at Saudi Telecom of the industry's largest EFM service deployment to date, enabled by more than 50,000 lines of Zhone EFM technology
- ▶ Over 9% growth for the year in our international revenues—and in Q4, international revenues topped 54% of our total for the quarter, evidence of the dynamic growth we see in telecom markets worldwide, our focus on those growth markets, and our reduced exposure to any domestic economic downturn
- ▶ Achievement of break-even pro-forma EBITDA in the fourth quarter, reflecting our ability to grow profitably
- ▶ Divestiture of legacy product lines to further concentrate resources on SLMS products and markets

We move into 2008 with high expectations for another round of innovative product launches and with enthusiasm about increasing demand for our product solutions for converged networks. Given our demonstrated ability to win deals against the largest access equipment providers on the global stage, we believe that we are well positioned to capitalize on continued telecom market growth. I am greatly indebted to you, our long-term investors, for your steadfast support.

Mory Ejabat
Chief Executive Officer, President and
Chairman of the Board of the Directors

SELECTED FINANCIAL DATA

The following selected financial data has been derived from our consolidated financial statements and should be read in conjunction with the consolidated financial statements and notes thereto, and with "Management's Discussion and Analysis of Financial Condition and Results of Operations." To date, we have generated a significant amount of revenue from sales of products obtained through acquisitions, as well as incurred significant acquisition related charges such as in-process research and development charges as discussed in Note 2 to the consolidated financial statements and in Management's Discussion and Analysis of Financial Condition and Results of Operations. During the years ended December 31, 2007, 2006, 2005, 2004 and 2003, we recorded charges of zero, \$113.7 million, \$102.1 million, \$0.2 million, and zero, respectively, related to the impairment of acquisition related intangibles and goodwill as discussed in Note 3 to the consolidated financial statements. In addition, all per share and weighted average share data for 2003 has been restated retroactively to reflect the effect of the Tellium merger in November 2003. The historical results are not necessarily indicative of results to be expected for any future period.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We believe that we are the first company dedicated solely to developing the full spectrum of next-generation access network solutions to cost-effectively deliver high bandwidth services while simultaneously preserving the investment in today's networks. Our next-generation solutions are based upon our Single Line Multi Service, or SLMS, architecture. From its inception, this SLMS architecture was specifically designed for the delivery of multiple classes of subscriber services (such as voice, data and video distribution), rather than being based on a particular protocol or media. In other words, our SLMS products are built to support the migration from legacy circuit to packet technologies and from copper to fiber technologies. This flexibility and versatility allows our products to adapt to future technologies while allowing service providers to focus on the delivery of additional high bandwidth services. Because this SLMS architecture is designed to interoperate with existing legacy equipment, service providers can leverage their existing networks to deliver a combination of voice, data and video services today, while they migrate, either simultaneously or at a future date, from legacy equipment to next-generation equipment with minimal interruption. We believe that our SLMS solution provides an evolutionary path for service providers from their existing infrastructures, as well as gives newer service providers the capability to deploy cost-effective, multi-service networks that can support voice, data and video.

Our product offerings fall within two categories: (1) the SLMS product family and (2) legacy, services, and other. Commencing with the first quarter of 2007, we have reported our optical transport business with our legacy, services and other product category. We have reclassified prior period balances in order to conform to the current period's presentation. We sold our legacy iMarc product line in December 2006, our legacy Access Node product line in December 2007 and our legacy GigaMux product line in January 2008.

Our global customer base includes regional, national and international telecommunications carriers, as well as cable service providers. To date, our products are deployed by over 600 network service providers on six continents worldwide. We believe that we have assembled the employee base, technological breadth and market presence to provide a simple yet comprehensive set of next-generation solutions to the bandwidth bottleneck in the access network and the other problems encountered by network service providers when delivering communications services to subscribers.

Since inception, we have incurred significant operating losses and had an accumulated deficit of \$913.1 million as of December 31, 2007.

Going forward, our key financial objectives include the following:

- Increasing revenue while continuing to carefully control costs;
- Continued investments in strategic research and product development activities that will provide the maximum potential return on investment; and
- Minimizing consumption of our cash and short-term investments.

Acquisitions

Since inception, we have utilized a strategy of acquisitions to acquire customers, technology and build scale within the network access markets. As of December 31, 2007, we had completed twelve acquisitions of complementary companies, products or technologies to supplement our internal growth. To date, we have generated a significant amount of our revenue from sales of products obtained through acquisitions. Some of the more significant acquisitions have included Paradyne in September 2005, Sorrento Networks Corporation in July 2004, and Tellium Inc. in November 2003.

If we complete additional acquisitions in the future, we could consume cash, incur substantial additional debt and other liabilities, incur amortization expenses related to acquired intangible assets or incur large write-offs related to impairment of goodwill and long-lived assets. In addition, future acquisitions may have a significant impact on our short term results of operations, materially impacting revenues or expenses and making period to period comparisons of our results of operations less meaningful.

Critical Accounting Policies and Estimates

Management's discussion and analysis of financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States of America. The preparation of these consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. The policies discussed below are considered by management to be critical because changes in such estimates can materially affect the amount of our reported net income or loss. For all of these policies, management cautions that actual results may differ materially from these estimates under different assumptions or conditions.

Revenue Recognition

We recognize revenue when the earnings process is complete. We recognize product revenue upon shipment of product under contractual terms which transfer title to customers upon shipment, under normal credit terms, net of estimated sales returns and allowances at the time of shipment. Revenue is deferred if there are significant post-delivery obligations, if collection is not considered reasonably assured at the time of sale, or if the fees are not fixed or determinable. When significant post-delivery obligations exist, revenue is deferred until such obligations are fulfilled. Our arrangements generally do not have any significant post-delivery obligations. We offer products and services such as support, education and training, hardware upgrades and post-warranty support. For multiple element revenue arrangements, we establish the fair value of these products and services based primarily on sales prices when the products and services are sold separately. If fair value cannot be established for undelivered elements, all of the revenue under the arrangement is deferred until those elements have been delivered. When collectibility is not reasonably assured, revenue is recognized when cash is collected. Revenue from education services and support services is recognized over the contract term or as the service is performed. We make certain sales to product distributors. These customers are given certain privileges to return a portion of inventory. Return privileges generally allow distributors to return inventory based on a percent of purchases made within a specific period of time. We recognize revenue on sales to distributors that have contractual return rights when the products have been sold by the distributors, unless there is sufficient customer specific sales and sales returns history to support revenue recognition upon shipment. In those instances when shipments made to distributors are recognized upon shipment of the products from the factory, we use historical rates of return from the distributors to provide for estimated product returns in accordance with Statement of Financial Accounting Standards ("SFAS") No. 48, *Revenue Recognition When Right of Return Exists*. We accrue for warranty costs, sales returns and other allowances at the time of shipment based on historical experience and expected future costs.

Allowances for Sales Returns and Doubtful Accounts

We record an allowance for sales returns for estimated future product returns related to current period product revenue. The allowance for sales returns is recorded as a reduction of revenue and an allowance against our accounts receivable. We base our allowance for sales returns on periodic assessments of historical trends in product return rates and current approved returned products. If the actual future returns were to deviate from the historical data on which the reserve had been established, our future revenue could be adversely affected. We record an allowance for doubtful accounts for estimated losses resulting from the inability of customers to make payments for amounts owed to us. The allowance for doubtful accounts is recorded as a charge to general and administrative expenses. We base our allowance on periodic assessments of our customers' liquidity and

financial condition through analysis of information obtained from credit rating agencies, financial statement reviews and historical collection trends. Additional allowances may be required in the future if the liquidity or financial condition of our customers deteriorates, resulting in impairment in their ability to make payments.

Valuation of Long-Lived Assets, Including Goodwill and Other Acquisition-Related Intangible Assets

Our long-lived assets have consisted primarily of goodwill, other acquisition-related intangible assets and property and equipment. We review goodwill for impairment in November of each year, or more frequently if events or circumstances indicate the carrying value of an asset may not be recoverable in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS 142). Such events or circumstances include, but are not limited to, a significant decrease in the benefits realized from an acquired business, difficulty and delays in integrating an acquired business, a significant change in the operations of an acquired business, or significant negative economic trends, such as stock price movements. The provisions of SFAS 142 require that a two-step impairment test be performed on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. We have determined that we operate in a single segment with one operating unit. We estimate the fair value of our reporting unit based on a combination of the market, income and replacement cost approaches. In the application of the impairment testing, we are required to make estimates of future operating trends and resulting cash flows and judgments on discount rates and other variables. Actual future results and other assumed variables could differ from these estimates. If the fair value of the reporting unit exceeds the carrying value, goodwill is not impaired and we are not required to perform further testing. If the carrying value exceeds the fair value of the reporting unit, then we must perform the second step of the impairment test in order to determine the implied fair value of the reporting unit. An impairment loss is recognized to the extent that the carrying amount exceeds the implied fair value of the reporting unit.

During 2006 and 2005, we determined that indicators of impairment existed, resulting in an impairment charge to goodwill of \$110.5 million and \$55.2 million, respectively. Due to uncertain market conditions and potential changes in our strategy and product portfolio, it is possible that forecasts used to support our goodwill may change in the future, which could result in additional non-cash impairment charges that would adversely affect our results of operations and financial condition. As of December 31, 2007, we had \$70.4 million of goodwill.

In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, we review long-lived assets, including intangible assets subject to amortization and property and equipment, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be fully recoverable based on expected undiscounted cash flows attributable to that asset. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future net undiscounted cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset.

During 2006 and 2005, we determined that indicators of impairment related to our intangible assets existed and an impairment analysis was performed, resulting in an impairment loss to amortizable intangible assets of \$3.2 million and \$46.9 million, respectively. As a result of the impairment charges, our amortizable intangible assets at December 31, 2007 and December 31, 2006 were zero. At December 31, 2007, our other long-lived assets consisted of \$20.8 million of net property and equipment.

Stock-Based Compensation

In the first quarter of 2006, we adopted SFAS No. 123R (revised 2004), *Share-Based Payment* (SFAS 123R), which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors based on estimated fair values. We adopted the modified prospective method of transition under which prior periods are not restated for comparative purposes. We have estimated the

fair value of stock-based payment awards on the date of grant using the Black Scholes pricing model, which is affected by our stock price as well as assumptions regarding a number of complex and subjective variables. These variables include our expected stock price volatility over the term of the awards, actual and projected employee option exercise behaviors, risk free interest rate and expected dividends. The expected stock price volatility is based on the weighted average of the historical volatility of our common stock over the most recent period commensurate with the estimated expected life of our stock options and historical volatility of our peers where we lack our own historical information. We base our expected life assumption on our historical experience and on the terms and conditions of the stock awards we grant to employees. Risk free interest rates reflect the yield on zero-coupon U.S. Treasury securities. We do not anticipate paying any cash dividends in the foreseeable future and therefore use an expected dividend yield of zero.

If factors change, and we employ different assumptions for estimating stock-based compensation expense in future periods, or if we decide to use a different valuation model, the future periods may differ significantly from what we have recorded in the current period and could materially affect our operating income, net loss and net loss per share. We are also required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates.

Fair value stock-based compensation expense under SFAS 123R for the year ended December 31, 2007 includes compensation expense for share-based payment awards granted prior to, but not yet vested as of December 31, 2005 based on the grant date fair value estimated in accordance with the pro-forma provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, and compensation expense for the share-based payment awards granted subsequent to December 31, 2005 based on the grant date fair value estimated in accordance with the provisions of SFAS 123R. In conjunction with the provisions of SFAS 123R, we changed our method of attributing the value of stock-based compensation to expense from the accelerated method to the straight line method. Compensation expense for all employee share-based payment awards granted on or prior to December 31, 2005 will continue to be recognized using the accelerated method while compensation expense for all share-based payment awards granted subsequent to December 31, 2005 is recognized using the straight line method.

Prior to the adoption of SFAS 123R, we recognized compensation cost for stock options issued or assumed through acquisitions, based on the intrinsic value, which represents the difference between the exercise price of each stock option granted or assumed and the fair market value of the underlying common stock at the grant date or consummation date of the business combination. The resulting deferred stock compensation was amortized over the vesting periods of the applicable options. See Note 6 to the consolidated financial statements for further information. In addition, we have reclassified prior years stock based compensation expense to the associated operating expense line items in the consolidated statements of operations in order to conform to the current year presentation.

In addition, stock-based compensation expense was recorded for options issued to non-employees. These options are generally immediately exercisable and expire seven to ten years from the date of grant. We value non-employee options using the Black Scholes model. Non-employee options subject to vesting are valued as they become vested.

Inventories

Inventories are stated at the lower of cost or market, with cost being determined using the first-in, first-out (FIFO) method. In assessing the net realizable value of inventories, we are required to make judgments as to future demand requirements and compare these with the current or committed inventory levels. Once inventory has been written down to its estimated net realizable value, its carrying value cannot be increased due to subsequent changes in demand forecasts. To the extent that a severe decline in forecasted demand occurs, or we experience a higher incidence of inventory obsolescence due to rapidly changing technology and customer requirements, we may incur significant charges for excess inventory.

Operating Lease Liabilities

As a result of our acquisition of Paradyne in September 2005, we assumed certain lease liabilities for facilities in Largo, Florida. In accordance with Emerging Issues Task Force Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination* (EITF 95-3), we accrued a liability for the excess portion of these facilities. The computation of the estimated liability includes a number of assumptions and subjective variables. These variables include the level and timing of future sublease income, amount of contractual variable costs, future market rental rates, discount rate, and other estimated expenses. If circumstances change, and we employ different assumptions in future periods, the lease liability may differ significantly from what we have recorded in the current period and could materially affect our net loss and net loss per share.

RESULTS OF OPERATIONS

We list in the tables below the historical consolidated statement of operations as a percentage of revenue for the periods indicated.

	<u>Year Ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Net revenue	100%	100%	100%
Cost of revenue	66%	68%	59%
Gross profit	<u>34%</u>	<u>32%</u>	<u>41%</u>
Operating expenses:			
Research and product development	19%	19%	18%
Sales and marketing	19%	20%	20%
General and administrative	6%	7%	9%
Purchased in-process research and development	0%	0%	1%
Gain on sale of fixed assets	(0)%	0%	0%
Gain on sale of intangible assets	(3)%	0%	0%
Amortization of intangible assets	0%	1%	8%
Impairment of intangible assets and goodwill	0%	58%	67%
Total operating expenses	<u>41%</u>	<u>105%</u>	<u>123%</u>
Operating loss	(7)%	(73)%	(82)%
Interest expense	(1)%	(1)%	(2)%
Interest income	1%	1%	1%
Other income (expense), net	0%	0%	(1)%
Loss before income taxes	(7)%	(73)%	(84)%
Income tax provision	0%	0%	0%
Net loss	<u>(7)%</u>	<u>(73)%</u>	<u>(84)%</u>

2007 COMPARED WITH 2006

Revenue

Information about our revenue for products and services for 2007 and 2006 is summarized below (in millions):

	<u>2007</u>	<u>2006</u>	<u>Decrease</u>	<u>% change</u>
Products	\$164.6	\$181.9	\$(17.3)	(10)%
Services	10.8	12.4	(1.6)	(13)%
	<u>\$175.4</u>	<u>\$194.3</u>	<u>\$(18.9)</u>	<u>(10)%</u>

Information about our revenue for North America and International markets for 2007 and 2006 is summarized below (in millions):

	<u>2007</u>	<u>2006</u>	<u>Increase (Decrease)</u>	<u>% change</u>
Revenue by geography:				
United States	\$ 79.4	\$105.1	\$(25.7)	(24)%
Canada	10.5	10.6	(.1)	(1)%
Total North America	<u>89.9</u>	<u>115.7</u>	<u>(25.8)</u>	<u>(22)%</u>
Latin America	37.8	25.2	12.6	50%
Europe, Middle East, Africa	42.2	45.4	(3.2)	(7)%
Asia Pacific	5.5	8.0	(2.5)	(31)%
Total International	<u>85.5</u>	<u>78.6</u>	<u>6.9</u>	<u>9%</u>
Total	<u>\$175.4</u>	<u>\$194.3</u>	<u>\$(18.9)</u>	<u>(10)%</u>

Information about our revenue by product line for 2007 and 2006 is summarized below (in millions):

	<u>2007</u>	<u>2006</u>	<u>Increase (Decrease)</u>	<u>% change</u>
SLMS	\$123.2	\$118.2	\$ 5.0	4%
Legacy, service, and other	<u>52.2</u>	<u>76.1</u>	<u>(23.9)</u>	<u>(31)%</u>
	<u>\$175.4</u>	<u>\$194.3</u>	<u>\$(18.9)</u>	<u>(10)%</u>

Total revenue decreased 10% or \$18.9 million to \$175.4 million for 2007 compared to \$194.3 million for 2006. The decrease in total revenue was due to decreased demand for our legacy, service and other products compared to the prior year, particularly in the domestic region. Additionally, a reduction in customers' capital expenditure spending contributed to the overall decrease in revenue.

Product revenue accounted for the majority of the total decrease in revenue. In 2007, product revenue decreased 10% or \$17.3 million and service revenue decreased 13% or \$1.6 million compared to 2006. Service revenue represents revenue from maintenance and other services associated with product shipments.

International revenue increased 9% or \$6.9 million to \$85.5 million in 2007 and represented 49% of total revenue compared with 40% in 2006. The increase in international revenue represents the increasing opportunity for our next-generation products in both existing and new network deployments among emerging international carriers in Latin America. While we have experienced growth in international markets, we continue to encounter price-focused competitors and we anticipate this will continue as we pursue these markets.

By product family, revenue for our SLMS product family increased \$5.0 million or 4% in 2007 compared to 2006 due to increased adoption of IPTV, VoIP and broadband services, creating increased demand for our SLMS products, particularly in international territories. Revenue for our legacy products and services decreased \$23.9 million or 31% in 2007 as compared to 2006, supporting the growing shift from legacy technologies to our growing SLMS business. Additionally, we continue to divest non-strategic legacy products in order to focus our efforts on our SLMS product family. For example, during January 2008, we sold our GigaMux legacy product line, during the fourth quarter of 2007, we sold our AccessNode legacy product line, and in 2006, we divested our iMarc legacy product line. The decrease in legacy product revenue was driven by the sale of the iMarc product line at the end of 2006 and expected migration of legacy products to next generation solutions. We anticipate that the product mix will continue to shift toward next generation products within the SLMS product family.

While no customer accounted for 10% or more of net revenue in 2007, 2006 or 2005, we anticipate that our results of operations in any given period may depend to a large extent on sales to a small number of large accounts. As a result, our revenue for any quarter may be subject to significant volatility based upon changes in orders from one or a small number of key customers.

Cost of Revenue and Gross Profit

Total cost of revenue, including stock-based compensation, decreased \$15.3 million, or 12% to \$116.4 million for 2007, compared to \$131.7 million for 2006. Total cost of revenue was 66% of revenue for 2007, compared to 68% of revenue for 2006. The decrease in cost of revenue for 2007 compared to 2006 was primarily due to a significantly decreased obsolescence provision for legacy products. As compared to 2006, the 2007 provision for obsolescence decreased by \$7.1 million. In addition, gains of \$4.6 million related to the sale of the Access Node and iMarc product lines during 2007 further reduced cost of revenue as compared to the prior year. Finally, personnel related costs for 2007 decreased over 2006 by \$3.3 million due to the operating leverage on fixed manufacturing costs as a result of the consolidation of our manufacturing operations into one facility.

In December 2006, we entered into an agreement to sell inventory and certain assets related to our iMarc legacy product line to a third party. The sale of the iMarc product line was not treated as a discontinued operation since it did not represent a component of our company that had operations and cash flows that were clearly distinguishable, operationally and for financial reporting purposes, from the rest of the entity. Upon performance of certain obligations and delivery of assets in the first quarter of 2007, we recognized a gain of \$1.8 million that was recorded in cost of revenue. Upon sale of the remaining iMarc inventory during the second quarter of 2007, we recognized an additional gain to cost of revenue of \$1.1 million related to the sale of the legacy iMarc product line.

In December 2007, we sold inventory and certain assets related to our Access Node legacy product line to a third party. The sale of the Access Node product line was not treated as a discontinued operation since it did not represent a component of our company that had operations and cash flows that were clearly distinguishable, operationally and for financial reporting purposes, from the rest of the entity. Upon sale of the Access Node inventory, we recognized a gain of \$1.7 million that was recorded in cost of revenue. Additional gain may be recorded in the future contingent upon attainment of certain earnout provisions.

We expect that in the future, our cost of revenue will also vary as a percentage of net revenue depending on the mix and average selling prices of products sold in the future. In addition, competitive and economic pressures could cause us to reduce our prices, adjust the carrying values of our inventory, or record inventory charges relating to discontinued products and excess or obsolete inventory.

Research and Product Development Expenses

Research and product development expenses decreased 9% or \$3.4 million to \$32.7 million for 2007 compared to \$36.1 million for 2006. The decrease was primarily due to approximately \$1.4 million in non-recurring specific new product development efforts expended during 2006. We intend to continue to invest in research and product development to attain our strategic product development objectives, while seeking to manage the associated costs through expense controls. Additionally, for the year ended December 31, 2007, approximately \$0.7 million of stock-based compensation expense was included in research and product development expenses, compared to \$1.6 million during the year ended December 31, 2006. The decrease was primarily due to the decline in stock price as well as reduced volatility rate assumptions, increased forfeitures, and the decline in interest rates.

Sales and Marketing Expenses

Sales and marketing expenses decreased 13% or \$5.0 million to \$33.2 million for 2007 compared to \$38.2 million in 2006. The decrease was primarily attributable to reduced personnel related costs of \$1.2 million

from lower headcount as we realigned our resources to focus on emerging markets, and reduced demonstration and trade show expenses of \$1.8 million. Additionally, for the year ended December 31, 2007, approximately \$0.6 million of stock-based compensation expense was included in sales and marketing expenses, compared to \$1.4 million during the year ended December 31, 2006. The decrease was primarily due to the decline in stock price as well as reduced volatility rate assumptions, increased forfeitures, and the decline in interest rates.

General and Administrative Expenses

General and administrative expenses decreased 27% or \$3.8 million to \$10.2 million for 2007 compared to \$14.0 million for 2006. The decrease was primarily due to the reversal of certain contingent liabilities of \$1.1 million in the third quarter of 2007, reduced accounting and legal fees of \$1.4 million over the prior year, the reversal of certain liabilities of \$0.4 million in the first quarter of 2007, and a \$1.5 million favorable legal settlement in the second quarter of 2007, offset by a \$0.5 million accrual for acquired lease liabilities during the third quarter of 2007. Additionally, for the year ended December 31, 2007, approximately \$1.3 million of stock-based compensation expense was included in general and administrative expenses, compared to \$1.6 million during the year ended December 31, 2006. The decrease was primarily due to the decline in stock price as well as reduced volatility rate assumptions, increased forfeitures, and the decline in interest rates.

Gain on sale of fixed assets

Gain on sale of fixed assets increased from zero in 2006 to \$0.7 million in 2007. The gain in 2007 was primarily attributable to the sale of fixed assets associated with our sale of the Access Node legacy product line in December 2007.

Gain on sale of intangible assets

Gain on sale of intangible assets increased from zero in 2006 to \$5.0 million in 2007. The gain in 2007 was attributable to the sale of non-strategic legacy patents originally acquired from Paradyne.

Amortization of Intangible Assets

There was no amortization of intangible assets for 2007 compared to \$2.8 million for 2006 because the intangible assets were fully amortized as of December 31, 2006.

Impairment of Intangible Assets and Goodwill

We review goodwill and other long-lived assets, including intangible assets, for impairment annually or whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. During the third quarter of 2006, we determined that indicators of impairment existed as we experienced an adverse change in our business as evidenced by a decline in our projected revenue due to technology transition issues with our largest international customers, and a resulting decline in our market capitalization. We performed an impairment analysis which resulted in a non-cash goodwill impairment charge of \$110.5 million as the fair value of our reporting unit was less than book value. See Note 3 to the consolidated financial statements for further detail. We also recorded a non-cash impairment charge for other intangible assets of \$3.2 million, which represented the amount by which the carrying value of the intangible assets exceeded the fair value. No impairment of goodwill or intangible assets was recorded in 2007.

Interest Expense

Interest expense for 2007 decreased by \$0.6 million to \$2.2 million compared to 2006 due primarily to a decrease in the outstanding debt balances.

Interest Income

Interest income for 2007 decreased by \$0.5 million to \$1.8 million compared to 2006 due to lower average balances of cash and short-term investments.

Other Income, Net

Other income for 2007 decreased by \$0.2 million to \$0.04 million compared to \$0.2 million for 2006. The decrease was primarily due to foreign exchange losses of \$0.1 million on foreign currencies in the current year compared to exchange gains of \$0.2 million in the prior year. We transact business in various foreign countries and are exposed to currency exchange rate risk associated with foreign currency denominated assets and liabilities, primarily intercompany receivables and payables.

Income Tax Provision

During the years ended December 31, 2007 and 2006, we recorded an income tax provision of \$0.4 million and \$0.3 million, respectively, related to foreign and state taxes. No material provision or benefit for income taxes was recorded, due to our recurring operating losses and the significant uncertainty regarding the realization of our net deferred tax assets, against which we have continued to record a full valuation allowance.

2006 COMPARED WITH 2005

Revenue

Information about our revenue for products and services for 2006 and 2005 is summarized below (in millions):

	<u>2006</u>	<u>2005</u>	<u>Increase</u>	<u>% change</u>
Products	\$181.9	\$139.7	\$42.2	30%
Services	12.4	12.1	0.3	2%
	<u>\$194.3</u>	<u>\$151.8</u>	<u>\$42.5</u>	28%

Information about our revenue for North America and International markets for 2006 and 2005 is summarized below (in millions):

	<u>2006</u>	<u>2005</u>	<u>Increase (Decrease)</u>	<u>% change</u>
Revenue by geography:				
United States	\$105.1	\$ 86.9	\$18.2	21%
Canada	10.6	12.6	(2.0)	(16)%
Total North America	<u>115.7</u>	<u>99.5</u>	<u>16.2</u>	16%
Latin America	25.2	8.7	16.5	190%
Europe, Middle East, Africa	45.4	37.5	7.9	21%
Asia Pacific	8.0	6.1	1.9	31%
Total International	<u>78.6</u>	<u>52.3</u>	<u>26.3</u>	50%
Total	<u>\$194.3</u>	<u>\$151.8</u>	<u>\$42.5</u>	28%

Information about our revenue by product line for 2006 and 2005 is summarized below (in millions):

	<u>2006</u>	<u>2005</u>	<u>Increase (Decrease)</u>	<u>% change</u>
SLMS	\$118.2	\$ 66.9	\$51.3	77%
Legacy, service, and other	<u>76.1</u>	<u>84.9</u>	<u>(8.8)</u>	<u>(10)%</u>
	<u>\$194.3</u>	<u>\$151.8</u>	<u>\$42.5</u>	<u>28%</u>

Total revenue increased 28% or \$42.5 million to \$194.3 million for 2006 compared to \$151.8 million for 2005. The increase in total revenue was due to incremental revenue from the acquisition of Paradyne in September 2005, offset by lower sales of our legacy, service and other products. Additionally, we experienced increased demand for our SLMS products compared to the prior year, particularly in the international territories.

In 2006, product revenue increased 30% or \$42.2 million and service revenue remained consistent with an increase of 2% or \$0.3 million compared to 2005. Service revenue represents revenue from maintenance and other services associated with product shipments. The increase in both product and service revenue was due to incremental revenue from the Paradyne acquisition and increased demand for our SLMS products.

International revenue increased 50% or \$26.3 million to \$78.6 million in 2006 and represented 40% of total revenue compared with 34% in 2005. The significant increase in international revenue represents the increasing opportunity for our next-generation products in both existing and new network deployments among emerging international carriers in the Middle East and Latin America, as well as incremental revenue from Paradyne products.

By product family, revenue for our SLMS product family increased \$51.3 million or 77% in 2006 compared to 2005 due to the incremental revenue associated with Paradyne's broadband products. Revenue also increased due to increased adoption of IPTV, VoIP and broadband services, creating increased demand for our SLMS products, particularly in international territories. Revenue for our legacy products and services decreased \$8.8 million or 10% in 2006, supporting the growing shift from legacy technologies to our growing SLMS business. Additionally, we continue to divest non-strategic legacy products in order to focus our efforts on our SLMS product family. For example, during the fourth quarter of 2006, we entered into an agreement to divest our iMarc legacy product line, and in 2005, we divested our Meret, Sechtor, Arca Dacs and eLuminant legacy products. The decrease in legacy products was partially offset by incremental revenue from Paradyne service and narrowband products acquired in September 2005.

Cost of Revenue and Gross Profit

Total cost of revenue, including stock-based compensation, increased \$42.8 million, or 48% to \$131.7 million for 2006, compared to \$89.0 million for 2005. Total cost of revenue was 68% of revenue for 2006, compared to 59% of revenue for 2005. The increase in cost of revenue for 2006 compared to 2005 primarily relates to the increase in revenue from the acquisition of Paradyne in September 2005. The increase in cost of revenue for 2006 compared to 2005 also includes a \$7.2 million write off of inventory related to reduced demand of legacy products during the second quarter of 2006 and additional stock-based compensation of \$0.7 million related to the implementation of SFAS 123R in January 2006. In addition, 2005 included a net benefit of approximately \$2.8 million related to several infrequent transactions, including a benefit related to the sale of non-strategic products and a favorable settlement with a contract manufacturer, offset by charges for discontinued inventory resulting from integration efforts related to the Paradyne acquisition and other charges related to vendor and customer claims. Overall, gross profit also decreased due to the lack of operating leverage on fixed manufacturing costs at lower than anticipated revenue levels as well as lower pricing for strategic international customers.

Research and Product Development Expenses

Research and product development expenses increased 33% or \$9.0 million to \$36.1 million for 2006 compared to \$27.1 million for 2005. The increase was primarily due to increased investment in research and development and personnel related costs to support development enhancements to our existing products and our new next generation technologies, as well as development support for our acquired technologies. Additionally, for the year ended December 31, 2006, approximately \$1.6 million of stock-based compensation expense was included in research and product development expenses, compared to only \$0.2 million during the year ended December 31, 2005, primarily due to the implementation of SFAS 123R in January 2006.

Sales and Marketing Expenses

Sales and marketing expenses increased 28% or \$8.4 million to \$38.2 million for 2006 compared to \$29.8 million in 2005. The increase was primarily attributable to higher personnel related costs of \$3.3 million to support revenue growth, particularly in the international territories, as well as increased spending on trade shows, travel and other marketing related promotions of \$1.8 million. Additionally, for the year ended December 31, 2006, approximately \$1.4 million of stock-based compensation expense was included in sales and marketing expenses, compared to only \$0.2 million during the year ended December 31, 2005, primarily due to the implementation of SFAS 123R in January 2006.

General and Administrative Expenses

General and administrative expenses decreased 3% or \$0.5 million to \$14.0 million for 2006 compared to \$14.5 million for 2005. The decrease was primarily due to non recurring charges of \$1.5 million associated with the Paradyne acquisition in the prior year offset by increased costs to support a larger organization as a result of the Paradyne acquisition and higher bad debt of \$0.9 million associated with a customer bankruptcy in the first quarter of 2006. Additionally, for the year ended December 31, 2006, approximately \$1.6 million of stock-based compensation expense was included in general and administrative expenses primarily due to the implementation of SFAS 123R, compared to \$2.7 million during the year ended December 31, 2005, related to options granted to non-employees for services received in conjunction with the Paradyne acquisition.

Purchased In-Process Research and Development

In 2005, we recorded purchased in-process research and development charges of \$1.2 million relating to the acquisition of Paradyne because technological feasibility for certain research and development efforts by Paradyne had not been established and no future alternative uses for these research and development efforts existed.

Amortization of Intangible Assets

Amortization of intangible assets decreased \$9.7 million to \$2.8 million for 2006 compared to \$12.5 million for 2005. The decrease was primarily due to the impairment of intangibles in the third quarter of 2006 and the fourth quarter of 2005 as well as the sale of patents in the second quarter of 2006.

Impairment of Intangible Assets and Goodwill

We review goodwill and other long-lived assets, including intangible assets, for impairment annually or whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. During the third quarter of 2006, we determined that indicators of impairment existed as we experienced an adverse change in our business as evidenced by a decline in our projected revenue due to technology transition issues with our largest international customers, and a resulting decline in our market capitalization. We performed an impairment analysis which resulted in a non-cash goodwill impairment charge of \$110.5 million as the fair value of our reporting unit was less than book value. See Note 3 to the consolidated financial statements for further detail. We also recorded a non-cash impairment charge for other intangible assets of \$3.2 million, which represented the amount by which the carrying value of the intangible assets exceeded the fair value.

The impairment charge in 2005 related to the impairment of goodwill of \$55.2 million and acquired intangibles of \$46.9 million. The primary circumstance leading to the impairment of intangibles was a decline in our projected future cash flows associated with technology and other intangibles acquired from our prior acquisitions. The impairment reflects a more rapid decline in projected revenue from certain legacy products than previously anticipated as customers transition to next generation products.

Interest Expense

Interest expense for 2006 decreased by \$0.6 million to \$2.8 million compared to 2005 due primarily to a decrease in the outstanding debt balances.

Interest Income

Interest income for 2006 increased by \$0.9 million to \$2.3 million due to higher average balances of cash and short-term investments.

Other Income (Expense), Net

Other income was \$0.2 million for 2006 compared to other expense of \$0.5 million for 2005. The change was primarily due to exchange gains on foreign currencies in the current year compared to exchange losses in the prior year. We transact business in various foreign countries and are exposed to currency exchange rate risk associated with foreign currency denominated assets and liabilities, primarily intercompany receivables and payables.

Income Tax Provision

During the years ended December 31, 2006 and 2005, we recorded an income tax provision of \$0.3 million and \$0.2 million, respectively, related to foreign and state taxes. No deferred tax benefit was recorded due to our operating losses and net operating loss carryforwards. Due to the significant uncertainty regarding the realization of our net deferred tax assets, a full valuation allowance was recorded.

LIQUIDITY AND CAPITAL RESOURCES

Our operations are financed through a combination of our existing cash, cash equivalents and investments, available credit facilities, and sales of equity and debt instruments, based on our operating requirements and market conditions.

At December 31, 2007, cash, cash equivalents and short-term investments were \$50.2 million compared to \$64.3 million at December 31, 2006. Total debt was \$34.4 million at December 31, 2007 as compared to \$41.5 million at December 31, 2006. The decrease in cash and cash equivalents of \$9.2 million was attributable to net cash used in operating and financing activities of \$14.8 million and \$6.5 million, respectively, offset by net cash provided by investing activities of \$11.6 million and changes in exchange rate of \$0.5 million.

Operating Activities

For fiscal year 2007, net cash used in operating activities consisted of the net loss of \$12.1 million, adjusted for non-cash charges totaling \$8.4 million, and offset by a gain on sale of assets of \$5.7 million and increases in net operating assets totaling \$5.4 million. The most significant components of the increases in net operating assets in 2007 were an increase in accounts receivable of \$4.7 million and a decrease in accrued and other liabilities of \$4.0 million, offset by an increase in accounts payable of \$2.4 million.

For fiscal year 2006, net cash used in operating activities consisted of the net loss of \$142.7 million, adjusted for non-cash charges totaling \$130.4 million and changes in operating assets and liabilities totaling \$3.9

million. The most significant components of the changes in operating assets and liabilities in 2006 were a decrease in accrued expenses of \$5.2 million and an increase in accounts receivable of \$3.1 million, offset by a decrease in inventories of \$3.3 million.

Investing Activities

For fiscal year 2007, net cash provided by investing activities consisted primarily of cash acquired through the net sale of short-term investments of \$5.4 million and proceeds from the sale of assets of \$7.3 million, offset by capital equipment purchases of \$1.4 million.

For fiscal year 2006, net cash provided by investing activities consisted primarily of cash acquired through the net sale of short-term investments of \$2.2 million and proceeds from the sale of patents and marketable securities of \$10.7 million, offset by capital equipment purchases of \$2.0 million.

Financing Activities

For fiscal year 2007, net cash used in financing activities consisted primarily of repayment of debt of \$7.6 million, partially offset by proceeds from the issuance of common stock of \$0.7 million and borrowings under credit facilities of \$0.5 million.

For fiscal year 2006, net cash provided by financing activities included proceeds from the issuance of common stock of \$2.3 million and proceeds from the repayment of officer loans of \$0.6 million, offset by the repayment of debt of \$2.7 million primarily associated with a voluntary repayment of \$1.5 million of debenture debt, \$0.9 million repayment of a note payable and \$0.3 million of other principal debt payments on our secured real estate loan.

Cash Management

Our primary source of liquidity comes from our cash and cash equivalents and short-term investments, which totaled \$50.2 million at December 31, 2007, and our \$25.0 million revolving line of credit and letter of credit facility, and an accounts receivable purchase facility with Silicon Valley Bank, or the SVB Facilities.

Our short-term investments are classified as available-for-sale and consist of securities that are readily convertible to cash, including certificates of deposits, commercial paper and government securities, with original maturities at the date of acquisition ranging from 90 days to one year. At current revenue levels, we anticipate that some portion of our existing cash and cash equivalents and short-term investments will continue to be consumed by operations.

Under the SVB Facilities, we have the option of borrowing funds at agreed upon rates of interest, so long as the aggregate amount of outstanding borrowings does not exceed \$25.0 million. In addition, we may sell specific accounts receivables to Silicon Valley Bank, on a non recourse basis, at agreed upon discounts to the face amount of those accounts receivables, so long as the aggregate amount of outstanding accounts receivables does not exceed \$10.0 million. The SVB Facilities are renewed on an annual basis, and are currently scheduled to expire in March 2009. There can be no assurance that Silicon Valley Bank will agree to any future renewal of the SVB Facilities.

Under these facilities, \$15.0 million was outstanding at December 31, 2007, and an additional \$6.5 million was committed as security for various letters of credit. The amounts borrowed under the revolving credit facility bear interest, payable monthly, at a floating rate that, at our option, is either (1) Silicon Valley Bank's prime rate, or (2) the sum of the LIBOR rate plus 2.9%; provided that in either case, the minimum interest rate is 4.0%. The interest rate was 7.25% at December 31, 2007.

Our obligations under the SVB Facilities are secured by substantially all of our personal property assets and those of our subsidiaries, including our intellectual property. The SVB Facilities contain certain financial covenants, and customary affirmative covenants and negative covenants. If we do not comply with the various covenants and other requirements under the SVB Facilities, Silicon Valley Bank is entitled to, among other things, require the immediate repayment of all outstanding amounts and sell our assets to satisfy the obligations under the SVB Facilities. As of December 31, 2007, we were in compliance with these covenants.

Future Requirements and Funding Sources

Our fixed commitments for cash expenditures consist primarily of payments under operating leases, inventory purchase commitments, and payments of principal and interest for debt obligations. As a result of the Paradyne acquisition in 2005, we assumed a lease commitment for facilities in Largo, Florida. The term of the lease expires in June 2012 and had an estimated remaining obligation of approximately \$21.7 million as of December 31, 2007. We intend to continue to occupy only a portion of these facilities and are evaluating our options to exit the excess portion of the lease. We have recorded a liability of \$3.7 million as of December 31, 2007 in accordance with Emerging Issues Task Force Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination* (EITF 95-3), which we believe is adequate to cover costs incurred to exit the excess portion of these facilities.

As a result of the financial demands of major network deployments and the difficulty in accessing capital markets, network service providers continue to request financing assistance from their suppliers. From time to time, we may provide or commit to extend credit or credit support to our customers. This financing may include extending credit to customers. Depending upon market conditions, we may seek to factor these arrangements to financial institutions and investors to reduce the amount of our financial commitments associated with such arrangements. For example, during the year ended December 31, 2007, we sold \$2.0 million of customer trade receivables to financial institutions on a non-recourse basis in exchange for cash. The sale of the receivables did not represent a securitization, and there was no continuing involvement or interests in the receivables by us after the sale. Our ability to provide customer financing is limited and depends upon a number of factors, including our capital structure, the level of our available credit and our ability to factor commitments to third parties. Any extension of financing to our customers will limit the capital that we have available for other uses. As of December 31, 2007, we did not have any significant customer financing commitments.

In March 2004, we filed a Form S-3 Registration Statement which allows us to sell, from time to time, up to \$100 million of our common stock or other securities. Although we may use this multi-purpose shelf registration to raise additional capital, there can be no certainty as to when or if we may offer any securities under the shelf registration or what the terms of any such offering would be.

Our accounts receivable, while not considered a primary source of liquidity, represents a concentration of credit risk because a significant portion of the accounts receivable balance at any point in time typically consists of a relatively small number of customer account balances. As of December 31, 2007, no customers accounted for more than 10% of accounts receivable, and receivables from customers in territories outside of the United States of America represented 63% of accounts receivable. We do not currently have any material commitments for capital expenditures, or any other material commitments aside from operating leases for our facilities, inventory purchase commitments and debt.

We expect that operating losses and negative cash flows from operations will continue for at least the next year. Based on our current plans and business conditions, we believe that our existing cash, cash equivalents and short-term investments and available credit facilities will be sufficient to satisfy our anticipated cash requirements for the foreseeable future. For example, we generated additional cash through the sale of our GigaMux legacy product line during January 2008. However, we may require additional funds if our revenues or expenses fail to meet our current projections or to support other purposes and we may need to raise additional funds through debt or equity financing or from other sources. There can be no assurances that additional funding

will be available at all, or that if available, such financing will be obtainable on terms favorable to us. If we were to raise funds through the issuance of debt securities or other debt financing, the terms of such debt may include covenants, restrictions and financial ratios that may restrict our ability to operate our business. If we are unable to obtain additional capital or are required to obtain additional capital on terms that are not favorable to us, we may be required to reduce the scope of our planned product development and sales and marketing efforts.

Contractual Commitments and Off-Balance Sheet Arrangements

At December 31, 2007, our estimated future contractual commitments by fiscal year were as follows (in thousands):

	<u>Total</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>2012 and beyond</u>
Operating leases	\$22,880	\$ 4,874	\$4,597	\$4,478	\$ 4,478	\$4,453
Line of credit	15,000	15,000	—	—	—	—
Debt	19,405	265	349	350	18,441	—
Inventory purchase commitments	14	14	—	—	—	—
Total	<u>\$57,299</u>	<u>\$20,153</u>	<u>\$4,946</u>	<u>\$4,828</u>	<u>\$22,919</u>	<u>\$4,453</u>

Operating Leases

The operating lease amounts shown above represent primarily off-balance sheet arrangements. For operating lease commitments, a liability is generally not recorded on our balance sheet unless the facility represents an excess facility for which an estimate of the facility exit costs has been recorded on our balance sheet. For operating leases that include contractual commitments for operating expenses and maintenance, estimates of such amounts are included based on current rates. Payments made under operating leases will be treated as rent expense for the facilities currently being utilized. Of the total \$22.9 million operating lease amount, \$3.7 million has been recorded as a liability on our balance sheet as of December 31, 2007.

Line of Credit and Debt

The debt and line of credit obligations have been recorded as liabilities on our balance sheet. The debt obligation amounts shown above represent the scheduled principal repayments, but not the associated interest payments which may vary based on changes in market interest rates. At December 31, 2007, the interest rate on our outstanding debt obligations ranged from 7.25% to 8.1%.

As of December 31, 2007, we had \$15.0 million outstanding under our line of credit and an additional \$6.5 million committed as security for various letters of credit, as discussed in Note 5 to the consolidated financial statements.

Inventory Purchase Commitments

Inventory purchase commitments represent the amount of excess inventory purchase commitments that have been recorded as a liability on our balance sheet at December 31, 2007.

Recent Accounting Pronouncements

SFAS 157 – Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157) which defines fair value, establishes guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. SFAS 157 is effective for fiscal years beginning

after November 15, 2007 for financial assets and liabilities and for fiscal years beginning after November 15, 2008 for non-financial assets and liabilities. Earlier adoption is permitted, provided we have not yet issued financial statements, including for interim periods, for that fiscal year. We will be required to adopt SFAS 157 in our 2008 fiscal year for financial assets and liabilities and in our 2009 fiscal year for non-financial assets and liabilities. We are currently evaluating the impact of SFAS 157, but do not expect the adoption of SFAS 157 to have a material impact on our consolidated financial statements.

FIN 48 – Accounting for Uncertainty in Income Taxes

In July 2006, the FASB issued Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* (FIN 48), which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured, and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified on the balance sheet; and provides transition and interim period guidance, among other provisions. We were required to adopt FIN 48 in fiscal year 2007. The adoption of FIN 48 did not have a material impact on our consolidated financial statements.

SFAS 159 – Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS 159 is effective for us beginning in the first quarter of fiscal year 2008, although earlier adoption is permitted. We are currently evaluating the impact, if any, that the adoption of SFAS 159 will have on our consolidated financial statements.

SFAS 141R – Business Combinations

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R), which replaces SFAS No. 141. SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non controlling interest in the acquiree and the goodwill acquired. The Statement also establishes disclosure requirements which will enable users to evaluate the nature and financial effects of the business combination. SFAS 141R is effective for fiscal years beginning after December 15, 2008. We will be required to adopt SFAS 141R in our 2009 fiscal year. We are currently evaluating the impact, if any, that the adoption of SFAS 141R will have on our consolidated financial statements.

RISK FACTORS

Forward-looking Statements

This Annual Report, including “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. These statements are based on current expectations, estimates, forecasts and projections about the industries in which we operate and the beliefs and assumptions of our management. We use words such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “goal,” “intend,” “may,” “plan,” “project,” “seek,” “should,” “target,” “will,” “would,” variations of such words and similar expressions to identify forward-looking statements. In addition, statements that refer to projections of earnings, revenue, costs or other financial items; anticipated growth and trends in our business or key markets; future growth and revenues from our Single Line Multi-Service (SLMS) products; future economic conditions and performance; anticipated performance of products or services; plans, objectives and strategies for future operations; and other characterizations of future events or circumstances, are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict, including those identified in this section entitled “Risk Factors,” elsewhere in this report and in our most recent reports on Forms 10-K, 10-Q and 8-K filed with the SEC. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements for any reason.

Our future operating results are difficult to predict and our stock price may continue to be volatile.

As a result of a variety of factors discussed in our Annual Report on Form 10-K for the year ended December 31, 2007, our revenues for a particular quarter are difficult to predict. Our revenue and operating results may vary significantly from quarter to quarter due to a number of factors, many of which are outside of our control. The primary factors that may affect our results of operations include the following:

- commercial acceptance of our SLMS products;
- fluctuations in demand for network access products;
- the timing and size of orders from customers;
- the ability of our customers to finance their purchase of our products as well as their own operations;
- new product introductions, enhancements or announcements by our competitors;
- our ability to develop, introduce and ship new products and product enhancements that meet customer requirements in a timely manner;
- changes in our pricing policies or the pricing policies of our competitors;
- the ability of our company and our contract manufacturers to attain and maintain production volumes and quality levels for our products;
- our ability to obtain sufficient supplies of sole or limited source components;
- increases in the prices of the components we purchase, or quality problems associated with these components;
- unanticipated changes in regulatory requirements which may require us to redesign portions of our products;
- changes in accounting rules, such as recording expenses for employee stock option grants;
- integrating and operating any acquired businesses;
- our ability to achieve targeted cost reductions;

- how well we execute on our strategy and operating plans; and
- general economic conditions as well as those specific to the communications, internet and related industries.

Any of the foregoing factors, or any other factors discussed elsewhere herein, could have a material adverse effect on our business, results of operations, and financial condition that could adversely affect our stock price. In addition, public stock markets have experienced, and may in the future experience, extreme price and trading volume volatility, particularly in the technology sectors of the market. This volatility has significantly affected the market prices of securities of many technology companies for reasons frequently unrelated to or disproportionately impacted by the operating performance of these companies. These broad market fluctuations may adversely affect the market price of our common stock. In addition, if our average market capitalization falls below the carrying value of our assets for an extended period of time, this may indicate that the fair value of our net assets is below their carrying value, and may result in recording impairment charges related to our goodwill and other intangible assets. At December 31, 2007, we had goodwill with a carrying value of \$70.4 million.

We have incurred significant losses to date and expect that we will continue to incur losses in the foreseeable future. If we fail to generate sufficient revenue to achieve or sustain profitability, our stock price could decline.

We have incurred significant losses to date and expect that we will continue to incur losses in the foreseeable future. Our net losses for 2007 and 2006 were \$12.1 million and \$142.7 million, respectively, and we had an accumulated deficit of \$913.1 million at December 31, 2007. We have significant fixed expenses and expect that we will continue to incur substantial manufacturing, research and product development, sales and marketing, customer support, administrative and other expenses in connection with the ongoing development of our business. In addition, we may be required to spend more on research and product development than originally budgeted to respond to industry trends. We may also incur significant new costs related to acquisitions and the integration of new technologies and other acquisitions that may occur in the future. We may not be able to adequately control costs and expenses or achieve or maintain adequate operating margins. As a result, our ability to achieve and sustain profitability will depend on our ability to generate and sustain substantially higher revenue while maintaining reasonable cost and expense levels. If we fail to generate sufficient revenue to achieve or sustain profitability, we will continue to incur substantial operating losses and our stock price could decline.

We have significant debt obligations, which could adversely affect our business, operating results and financial condition.

As of December 31, 2007, we had approximately \$34.4 million of total debt, of which \$15.3 million was current and \$19.1 million was long-term. Our debt obligations could materially and adversely affect us in a number of ways, including:

- limiting our ability to obtain additional financing in the future for working capital, capital expenditures, acquisitions or general corporate purposes;
- limiting our flexibility to plan for, or react to, changes in our business or market conditions;
- requiring us to use a significant portion of any future cash flow from operations to repay or service the debt, thereby reducing the amount of cash available for other purposes;
- making us more highly leveraged than some of our competitors, which may place us at a competitive disadvantage; and
- making us more vulnerable to the impact of adverse economic and industry conditions and increases in interest rates.

We cannot assure you that we will be able to generate sufficient cash flow in amounts sufficient to enable us to service our debt or to meet our working capital and capital expenditure requirements. If we are unable to generate sufficient cash flow from operations or to borrow sufficient funds to service our debt, due to borrowing

base restrictions or otherwise, we may be required to sell assets, reduce capital expenditures or obtain additional financing. We cannot assure you that we will be able to engage in any of these actions on reasonable terms, if at all.

If we are unable to obtain additional capital to fund our existing and future operations, we may be required to reduce the scope of our planned product development, and marketing and sales efforts, which would harm our business, financial condition and results of operations.

The development and marketing of new products, and the expansion of our direct sales operations and associated support personnel requires a significant commitment of resources. We may continue to incur significant operating losses or expend significant amounts of capital if:

- the market for our products develops more slowly than anticipated;
- we fail to establish market share or generate revenue at anticipated levels;
- our capital expenditure forecasts change or prove inaccurate; or
- we fail to respond to unforeseen challenges or take advantage of unanticipated opportunities.

As a result, we may need to raise substantial additional capital. Additional capital, if required, may not be available on acceptable terms, or at all. For example, U.S. credit markets have recently experienced significant dislocations and liquidity disruptions which have caused the spreads on prospective debt financings to widen considerably. These circumstances have materially impacted liquidity in debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the unavailability of certain types of debt financing. Continued uncertainty in credit markets may negatively impact our ability to access debt financing on favorable terms, or at all. If additional capital is raised through the issuance of debt securities or other debt financing, the terms of such debt may include covenants, restrictions and financial ratios that may restrict our ability to operate our business. The recent events in the U.S. credit markets have also had an adverse effect on other U.S. financial markets, which may make it more difficult or costly for us to raise capital through the issuance of common stock, preferred stock or other equity securities. If we are unable to obtain additional capital or are required to obtain additional capital on terms that are not favorable to us, we may be required to reduce the scope of our planned product development and sales and marketing efforts, which would harm our business, financial condition and results of operations.

If demand for our SLMS products does not develop, then our results of operations and financial condition will be adversely affected.

Our future revenue depends significantly on our ability to successfully develop, enhance and market our SLMS products to the network service provider market. Most network service providers have made substantial investments in their current infrastructure, and they may elect to remain with their current architectures or to adopt new architectures, such as SLMS, in limited stages or over extended periods of time. A decision by a customer to purchase our SLMS products will involve a significant capital investment. We must convince our service provider customers that they will achieve substantial benefits by deploying our products for future upgrades or expansions. We do not know whether a viable market for our SLMS products will develop or be sustainable. If this market does not develop or develops more slowly than we expect, our business, financial condition and results of operations will be seriously harmed.

We depend upon the development of new products and enhancements to existing products, and if we fail to predict and respond to emerging technological trends and customers' changing needs, our operating results and market share may suffer.

The markets for our products are characterized by rapidly changing technology, evolving industry standards, changes in end-user requirements, frequent new product introductions and changes in communications offerings

from network service provider customers. Our future success depends on our ability to anticipate or adapt to such changes and to offer, on a timely and cost-effective basis, products that meet changing customer demands and industry standards. We may not have sufficient resources to successfully and accurately anticipate customers' changing needs and technological trends, manage long development cycles or develop, introduce and market new products and enhancements. The process of developing new technology is complex and uncertain, and if we fail to develop new products or enhancements to existing products on a timely and cost-effective basis, or if our new products or enhancements fail to achieve market acceptance, our business, financial condition and results of operations would be materially adversely affected.

Because our products are complex and are deployed in complex environments, our products may have defects that we discover only after full deployment by our customers, which could seriously harm our business.

We produce highly complex products that incorporate leading-edge technology, including both hardware and software. Software typically contains defects or programming flaws that can unexpectedly interfere with expected operations. In addition, our products are complex and are designed to be deployed in large quantities across complex networks. Because of the nature of these products, they can only be fully tested when completely deployed in large networks with high amounts of traffic, and there is no assurance that our pre-shipment testing programs will be adequate to detect all defects. As a result, our customers may discover errors or defects in our hardware or software, or our products may not operate as expected, after they have been fully deployed by our customers. If we are unable to cure a product defect, we could experience damage to our reputation, reduced customer satisfaction, loss of existing customers and failure to attract new customers, failure to achieve market acceptance, reduced sales opportunities, loss of revenue and market share, increased service and warranty costs, diversion of development resources, legal actions by our customers, and increased insurance costs. Defects, integration issues or other performance problems in our products could also result in financial or other damages to our customers. Our customers could seek damages for related losses from us, which could seriously harm our business, financial condition and results of operations. A product liability claim brought against us, even if unsuccessful, would likely be time consuming and costly. The occurrence of any of these problems would seriously harm our business, financial condition and results of operations.

A shortage of adequate component supply or manufacturing capacity could increase our costs or cause a delay in our ability to fulfill orders, and our failure to estimate customer demand properly may result in excess or obsolete component inventories that could adversely affect our gross margins.

Occasionally, we may experience a supply shortage, or a delay in receiving, certain component parts as a result of strong demand for the component parts and/or capacity constraints or other problems experienced by suppliers. If shortages or delays persist, the price of these components may increase, or the components may not be available at all, and we may also encounter shortages if we do not accurately anticipate our needs. Conversely, we may not be able to secure enough components at reasonable prices or of acceptable quality to build new products in a timely manner in the quantities or configurations needed. Accordingly, our revenue and gross margins could suffer until other sources can be developed. Our operating results would also be adversely affected if, anticipating greater demand than actually develops, we commit to the purchase of more components than we need. Furthermore, as a result of binding price or purchase commitments with suppliers, we may be obligated to purchase components at prices that are higher than those available in the current market. In the event that we become committed to purchase components at prices in excess of the current market price when the components are actually used, our gross margins could decrease.

We rely on contract manufacturers for a portion of our manufacturing requirements.

We rely on contract manufacturers to perform a portion of the manufacturing operations for our products. These contract manufacturers build product for other companies, including our competitors. In addition, we do not have contracts in place with some of these providers and may not be able to effectively manage those

relationships. We cannot be certain that our contract manufacturers will be able to fill our orders in a timely manner. We face a number of risks associated with this dependence on contract manufacturers including reduced control over delivery schedules, the potential lack of adequate capacity during periods of excess demand, poor manufacturing yields and high costs, quality assurance, increases in prices, and the potential misappropriation of our intellectual property. We have experienced in the past, and may experience in the future, problems with our contract manufacturers, such as inferior quality, insufficient quantities and late delivery of products.

We depend on sole or limited source suppliers for several key components. If we are unable to obtain these components on a timely basis, we will be unable to meet our customers' product delivery requirements, which would harm our business.

We currently purchase several key components from single or a limited number of suppliers. If any of our sole or limited source suppliers experience capacity constraints, work stoppages or any other reduction or disruption in output, they may be unable to meet our delivery schedules. Our suppliers may enter into exclusive arrangements with our competitors, be acquired by our competitors, stop selling their products or components to us at commercially reasonable prices, refuse to sell their products or components to us at any price or be unable to obtain or have difficulty obtaining components for their products from their suppliers. If we do not receive critical components from our sole or limited source suppliers in a timely manner, we will be unable to meet our customers' product delivery requirements. Any failure to meet a customer's delivery requirements could materially adversely affect our business, operating results and financial condition and could materially damage customer relationships.

Our target customer base is concentrated, and the loss of one or more of our customers could harm our business.

The target customers for our products are network service providers that operate voice, data and video communications networks. There are a limited number of potential customers in our target market. While no customer accounted for more than 10% of our revenue in 2007 or 2006, we expect that a significant portion of our future revenue will depend on sales of our products to a limited number of customers. Any failure of one or more customers to purchase products from us for any reason, including any downturn in their businesses, would seriously harm our business, financial condition and results of operations.

Industry consolidation may lead to increased competition and may harm our operating results.

There has been a trend toward industry consolidation in the communications equipment market for several years. We expect this trend to continue as companies attempt to strengthen or hold their market positions in an evolving industry and as companies are acquired or are unable to continue operations. We believe that industry consolidation may result in stronger competitors that are better able to compete as sole-source vendors for customers. This could have a material adverse effect on our business, financial condition and results of operations. Furthermore, rapid consolidation could result in a decrease in the number of customers we serve. Loss of a major customer could have a material adverse effect on our business, financial condition and results of operations.

We are exposed to the credit risk of some of our customers and to credit exposures in weakened markets, which could result in material losses.

Industry and economic conditions have weakened the financial position of some of our customers and their ability to access capital to finance their business operations, including capital expenditures. To sell to some of these customers, we may be required to assume incremental risks of uncollectible accounts or to extend credit or credit support. While we monitor these situations carefully and attempt to take appropriate measures to protect ourselves, including factoring credit arrangements to financial institutions, it is possible that we may have to defer revenue until cash is collected or write down or write off uncollectible accounts. Such write-downs or write-offs, if large, could have a material adverse effect on our operating results and financial condition.

The market we serve is highly competitive and we may not be able to compete successfully.

Competition in the communications equipment market is intense. This market is characterized by rapid change, converging technologies and a migration to networking solutions that offer superior advantages. We are aware of many companies in related markets that address particular aspects of the features and functions that our products provide. Currently, our primary competitors include Alcatel-Lucent, Calix, Huawei, and Occam Networks, among others. We also may face competition from other large communications equipment companies or other companies that may enter our market in the future. In addition, a number of companies have introduced products that address the same network needs that our products address, both domestically and abroad. Many of our competitors have longer operating histories, greater name recognition, larger customer bases and greater financial, technical, sales and marketing resources than we do and may be able to undertake more extensive marketing efforts, adopt more aggressive pricing policies and provide more customer financing than we can. In particular, we are encountering price-focused competitors from Asia, especially China, which places pressure on us to reduce our prices. If our competitors offer deep discounts on certain products, we may need to lower prices or offer other favorable terms in order to compete successfully. Moreover, our competitors may foresee the course of market developments more accurately than we do and could develop new technologies that render our products less valuable or obsolete.

In our markets, principal competitive factors include:

- product performance;
- interoperability with existing products;
- scalability and upgradeability;
- conformance to standards;
- breadth of services;
- reliability;
- ease of installation and use;
- geographic footprints for products;
- ability to provide customer financing;
- price;
- technical support and customer service; and
- brand recognition.

If we are unable to compete successfully against our current and future competitors, we may have difficulty obtaining or retaining customers, and we could experience price reductions, order cancellations, increased expenses and reduced gross margins, any of which could have a material adverse effect on our business, financial condition and results of operations.

Our success largely depends on our ability to retain and recruit key personnel, and any failure to do so would harm our ability to meet key objectives.

Our future success depends upon the continued services of our executive officers and our ability to identify, attract and retain highly skilled technical, managerial, sales and marketing personnel who have critical industry experience and relationships that we rely on to build our business, including Morteza Ejabat, our co-founder, Chairman, President and Chief Executive Officer, and Kirk Misaka, our Chief Financial Officer. The loss of the services of any of our key employees, including Messrs. Ejabat and Misaka, could delay the development and production of our products and negatively impact our ability to maintain customer relationships, which would harm our business, financial condition and results of operations.

Any strategic acquisitions or investments we make could disrupt our operations and harm our operating results.

As of December 31, 2007, we had acquired twelve companies or product lines since we were founded in 1999. Further, we may acquire additional businesses, products or technologies in the future. On an ongoing basis, we may evaluate acquisitions of, or investments in, complementary companies, products or technologies to supplement our internal growth. Also, in the future, we may encounter difficulties identifying and acquiring suitable acquisition candidates on reasonable terms.

If we do complete future acquisitions, we could:

- issue stock that would dilute our current stockholders' percentage ownership;
- consume a substantial portion of our cash resources;
- incur substantial debt;
- assume liabilities;
- increase our ongoing operating expenses and level of fixed costs;
- record goodwill and non-amortizable intangible assets that will be subject to impairment testing and potential periodic impairment charges;
- incur amortization expenses related to certain intangible assets;
- incur large and immediate write-offs; and
- become subject to litigation.

Any acquisitions or investments that we make in the future will involve numerous risks, including:

- difficulties in integrating the operations, technologies, products and personnel of the acquired companies;
- unanticipated costs;
- diversion of management's time and attention away from normal daily operations of the business and the challenges of managing larger and more widespread operations resulting from acquisitions;
- difficulties in entering markets in which we have no or limited prior experience;
- insufficient revenues to offset increased expenses associated with acquisitions and where competitors in such markets have stronger market positions; and
- potential loss of key employees, customers, distributors, vendors and other business partners of the companies we acquire following and continuing after announcement of acquisition plans.

Mergers and acquisitions of high-technology companies are inherently risky and subject to many factors outside of our control, and we cannot be certain that our previous or future acquisitions will be successful and will not materially adversely affect our business, operating results or financial condition. We do not know whether we will be able to successfully integrate the businesses, products, technologies or personnel that we might acquire in the future or that any strategic investments we make will meet our financial or other investment objectives. Any failure to do so could seriously harm our business, financial condition and results of operations.

We have been, and may continue to be, adversely affected by unfavorable economic and market conditions, and geopolitical uncertainties.

Economic conditions worldwide have contributed to slowdowns in the communications industry and may impact our business. Our customers and potential customers continue to experience a severe economic slowdown that has led to significant decreases in their revenues. In addition, recent disruptions in U.S. financial markets

have limited the ability of some of our customers and potential customers to access the capital needed to finance their business operations, including capital expenditures on new equipment and equipment upgrades. For most of the last decade, the markets for our equipment have been influenced by the entry into the communications services business of a substantial number of new companies. In the United States, this was due largely to changes in the regulatory environment, in particular those brought about by the Telecommunications Act of 1996. These new companies raised significant amounts of capital, much of which they invested in new equipment, causing acceleration in the growth of the markets for communications equipment. More recently, there has been a reversal of this trend, including the failure of a large number of the new entrants and a sharp contraction of the availability of capital to the industry. This industry trend has been compounded by the weakness in the United States economy as well as the economies in virtually all of the countries in which we market our products. In addition, the continuing turmoil in the geopolitical environment in many parts of the world, including terrorist activities and military actions, particularly the continuing tension in and surrounding Iraq, may continue to adversely affect global economic conditions. If the economic, market and geopolitical conditions in the United States and the rest of the world do not improve, or if they deteriorate, we may experience material adverse impacts on our business, operating results and financial condition.

Sales to communications service providers are especially volatile, and weakness in sales orders from this industry may harm our operating results and financial condition.

Sales activity in the service provider industry depends upon the stage of completion of expanding network infrastructures, the availability of funding, and the extent to which service providers are affected by regulatory, economic and business conditions in the country of operations. Although some service providers may be increasing capital expenditures over the depressed levels that have prevailed over the last few years, weakness in orders from this industry could have a material adverse effect on our business, operating results and financial condition. Slowdowns in the general economy, overcapacity, changes in the service provider market, regulatory developments and constraints on capital availability have had a material adverse effect on many of our service provider customers, with many of these customers going out of business or substantially reducing their expansion plans. These conditions have materially harmed our business and operating results, and we expect that some or all of these conditions may continue for the foreseeable future. Finally, service provider customers typically have longer implementation cycles; require a broader range of service including design services; demand that vendors take on a larger share of risks; often require acceptance provisions, which can lead to a delay in revenue recognition; and expect financing from vendors. All these factors can add further risk to business conducted with service providers.

Decreased effectiveness of share-based compensation could adversely affect our ability to attract and retain employees.

We have historically used stock options as a key component of our employee compensation program in order to align the interests of our employees with the interests of our stockholders, encourage employee retention and provide competitive compensation and benefit packages. In the first quarter of 2006, we adopted SFAS 123R, which required the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors based on estimated fair values. As a result, starting with fiscal 2006, our operating results contain a charge for share-based compensation expense related to employee stock options and employee stock purchases. This charge is in addition to share-based compensation expense we have recognized in prior periods related to stock options under APB Opinion No. 25. As a result of the adoption of SFAS 123R, beginning with fiscal 2006, our earnings were lower than they would have been had we not been required to adopt SFAS 123R. This will continue to be the case for future periods. We cannot predict the effect that this adverse impact on our reported operating results will have on the trading price of our common stock. If the trading price of our common stock declines, this would reduce the value of our share-based compensation to our present employees and could affect our ability to retain them. In addition, in recent periods, some of our employee stock options have had exercise prices in excess of our stock price, which reduces their value to employees and could affect our ability to retain present, or attract prospective employees. Moreover, difficulties

relating to obtaining stockholder approval of equity compensation plans could make it harder or more expensive for us to grant share-based payments to employees in the future.

Due to the international nature of our business, political or economic changes or other factors in a specific country or region could harm our future revenue, costs and expenses and financial condition.

We currently have international operations consisting of sales and technical support teams in various locations around the world. We expect to continue expanding our international operations in the future. The successful management and expansion of our international operations requires significant human effort and the commitment of substantial financial resources. Further, our international operations may be subject to certain risks and challenges that could harm our operating results, including:

- trade protection measures and other regulatory requirements which may affect our ability to import or export our products into or from various countries;
- political considerations that affect service provider and government spending patterns;
- differing technology standards or customer requirements;
- developing and customizing our products for foreign countries;
- fluctuations in currency exchange rates;
- longer accounts receivable collection cycles and financial instability of customers;
- difficulties and excessive costs for staffing and managing foreign operations;
- potentially adverse tax consequences; and
- changes in a country's or region's political and economic conditions.

Any of these factors could harm our existing international operations and business or impair our ability to continue expanding into international markets.

Compliance or the failure to comply with current and future environmental regulations could cause us significant expense.

We are subject to a variety of federal, state, local and foreign environmental regulations. If we fail to comply with any present and future regulations, we could be subject to future liabilities, the suspension of production or a prohibition on the sale of our products. In addition, such regulations could require us to incur other significant expenses to comply with environmental regulations, including expenses associated with the redesign of any non-compliant product. From time to time new regulations are enacted, and it is difficult to anticipate how such regulations will be implemented and enforced. For example, in 2003 the European Union enacted the Restriction on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Directive (RoHS) and the Waste Electrical and Electronic Equipment Directive (WEEE), for implementation in European Union member states. We are aware of similar legislation that is currently in force or is being considered in the United States, as well as other countries, such as Japan and China. Our failure to comply with any of such regulatory requirements or contractual obligations could result in our being liable for costs, fines, penalties and third-party claims, and could jeopardize our ability to conduct business in countries in the jurisdictions where these regulations apply.

Adverse resolution of litigation may harm our operating results or financial condition.

We are a party to various lawsuits and claims in the normal course of our business. Litigation can be expensive, lengthy, and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. An unfavorable resolution of a particular lawsuit could have a material adverse effect on our business, operating results and financial condition. For additional information regarding litigation in which we are involved, see Note 11 to our consolidated financial statements.

Our intellectual property rights may prove difficult to protect and enforce.

We generally rely on a combination of copyrights, patents, trademarks and trade secret laws and restrictions on disclosure to protect our intellectual property rights. We also enter into confidentiality or license agreements with our employees, consultants and corporate partners, and control access to and distribution of our proprietary information. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy or otherwise obtain and use our products or technology. Monitoring unauthorized use of our technology is difficult, and we do not know whether the steps we have taken will prevent unauthorized use of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as extensively as in the United States. We cannot assure you that our pending, or any future, patent applications will be granted, that any existing or future patents will not be challenged, invalidated, or circumvented, or that any existing or future patents will be enforceable. While we are not dependent on any individual patents, if we are unable to protect our proprietary rights, we may find ourselves at a competitive disadvantage to others who need not incur the substantial expense, time and effort required to create the innovative products.

We may be subject to intellectual property infringement claims that are costly and time consuming to defend and could limit our ability to use some technologies in the future.

Third parties have in the past and may in the future assert claims or initiate litigation related to patent, copyright, trademark and other intellectual property rights to technologies and related standards that are relevant to us. The asserted claims or initiated litigation can include claims against us or our manufacturers, suppliers or customers alleging infringement of their proprietary rights with respect to our existing or future products, or components of those products. We have received correspondence from companies claiming that many of our products are using technology covered by or related to the intellectual property rights of these companies and inviting us to discuss licensing arrangements for the use of the technology. Regardless of the merit of these claims, intellectual property litigation can be time consuming and costly, and result in the diversion of technical and management personnel. Any such litigation could force us to stop selling, incorporating or using our products that include the challenged intellectual property, or redesign those products that use the technology. In addition, if a party accuses us of infringing upon its proprietary rights, we may have to enter into royalty or licensing agreements, which may not be available on terms acceptable to us, if at all. If we are unsuccessful in any such litigation, we could be subject to significant liability for damages and loss of our proprietary rights. Any of these results could have a material adverse effect on our business, financial condition and results of operations.

We rely on the availability of third party licenses.

Many of our products are designed to include software or other intellectual property licensed from third parties. It may be necessary in the future to seek or renew licenses relating to various elements of the technology used to develop these products. We cannot assure you that our existing and future third-party licenses will be available to us on commercially reasonable terms, if at all. Our inability to maintain or obtain any third-party license required to sell or develop our products and product enhancements could require us to obtain substitute technology of lower quality or performance standards, or at greater cost.

The long and variable sales cycles for our products may cause revenue and operating results to vary significantly from quarter to quarter.

The target customers for our products have substantial and complex networks that they traditionally expand in large increments on a periodic basis. Accordingly, our marketing efforts are focused primarily on prospective customers that may purchase our products as part of a large-scale network deployment. Our target customers typically require a lengthy evaluation, testing and product qualification process. Throughout this process, we are often required to spend considerable time and incur significant expense educating and providing information to prospective customers about the uses and features of our products. Even after a company makes the final decision to purchase our products, it may deploy our products over extended periods of time. The timing of deployment of our products varies widely, and depends on a number of factors, including our customers' skill sets, geographic

density of potential subscribers, the degree of configuration and integration required to deploy our products, and our customers' ability to finance their purchase of our products as well as their operations. As a result of any of these factors, our revenue and operating results may vary significantly from quarter to quarter.

The communications industry is subject to government regulations, which could harm our business.

The FCC has jurisdiction over the entire communications industry in the United States and, as a result, our existing and future products and our customers' products are subject to FCC rules and regulations. Changes to current FCC rules and regulations and future FCC rules and regulations could negatively affect our business. The uncertainty associated with future FCC decisions may cause network service providers to delay decisions regarding their capital expenditures for equipment for broadband services. In addition, international regulatory bodies establish standards that may govern our products in foreign markets. Changes to or future domestic and international regulatory requirements could result in postponements or cancellations of customer orders for our products and services, which would harm our business, financial condition and results of operations. Further, we cannot be certain that we will be successful in obtaining or maintaining regulatory approvals that may, in the future, be required to operate our business.

The ability of unaffiliated stockholders to influence key transactions, including changes of control, may be limited by significant insider ownership, provisions of our charter documents and provisions of Delaware law.

At December 31, 2007, our executive officers, directors and entities affiliated with them beneficially owned, in the aggregate, approximately 29% of our outstanding common stock. These stockholders, if acting together, will be able to influence substantially all matters requiring approval by our stockholders, including the election of directors and the approval of mergers or other business combination transactions. Circumstances may arise in which the interests of these stockholders could conflict with the interests of our other stockholders. These stockholders could delay or prevent a change in control of our company even if such a transaction would be beneficial to our other stockholders. In addition, provisions of our certificate of incorporation, bylaws and Delaware law could make it more difficult for a third party to acquire us, even if doing so would be beneficial to certain stockholders.

Our business and operations are especially subject to the risks of earthquakes and other natural catastrophic events.

Our corporate headquarters, including a significant portion of our research and development operations, are located in Northern California, a region known for seismic activity. Additionally, some of our facilities, including our manufacturing facilities, are located near geographic areas that have experienced hurricanes in the past. A significant natural disaster, such as an earthquake, hurricane, fire, flood or other catastrophic event, could severely affect our ability to conduct normal business operations, and as a result, our future operating results could be materially and adversely affected.

MARKET PRICE, DIVIDENDS AND RELATED STOCKHOLDER MATTERS

Price Range of Common Stock

Our common stock is listed on the Nasdaq Global Market under the symbol “ZHNE”. The following table sets forth, for the periods indicated, the high and low per share sales prices of our common stock as reported on Nasdaq.

2007:	<u>High</u>	<u>Low</u>
Fourth Quarter ended December 31, 2007	\$1.64	\$1.16
Third Quarter ended September 30, 2007	1.45	1.06
Second Quarter ended June 30, 2007	1.58	1.17
First Quarter ended March 31, 2007	1.37	1.12
2006:		
	<u>High</u>	<u>Low</u>
Fourth Quarter ended December 31, 2006	\$1.55	\$0.97
Third Quarter ended September 30, 2006	2.10	1.03
Second Quarter ended June 30, 2006	2.73	1.81
First Quarter ended March 31, 2006	2.87	2.03

As of December 31, 2007, there were 1,872 registered stockholders of record. A substantially greater number of holders of Zhone common stock are “street name” or beneficial holders, whose shares are held of record by banks, brokers and other financial institutions.

Dividend Policy

We have never paid or declared any cash dividends on our common stock or other securities and do not anticipate paying cash dividends in the foreseeable future. Any future determination to pay cash dividends will be at the discretion of the Board of Directors, subject to any applicable restrictions under our debt and credit agreements, and will be dependent upon our financial condition, results of operations, capital requirements, general business condition and such other factors as the Board of Directors may deem relevant.

STOCK PERFORMANCE GRAPH

The graph depicted below compares the cumulative total stockholder return on Zhone common stock during the period from Zhone's initial stock listing date through December 31, 2007, with the cumulative total return on the S&P 500 Index and the Nasdaq Telecommunications Index. The comparison assumes \$100 was invested on November 14, 2003 (the date Zhone common stock began to be publicly traded) in each of Zhone common stock, the S&P 500 Index and the Nasdaq Telecommunications Index, and assumes that all dividends, if any, were reinvested. Stockholder returns over the indicated period are based on historical data and should not be considered indicative of future stockholder returns.

Comparison of Cumulative Total Return*
Among Zhone Technologies, Inc.,
the S&P 500 Index and
the Nasdaq Telecommunications Index

* Prior to November 14, 2003, Zhone common stock was not publicly traded. Comparative data is provided only for the period since that date. Figures rounded to nearest dollar.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Cash, Cash Equivalents and Investments

We consider all cash and highly liquid investments purchased with an original maturity of less than three months to be cash equivalents.

Cash, cash equivalents and short-term investments consisted of the following as of December 31, 2007 and 2006 (in thousands):

	<u>December 31,</u> <u>2007</u>	<u>December 31,</u> <u>2006</u>
Cash and cash equivalents	\$37,804	\$46,973
Short-term investment	<u>12,361</u>	<u>17,337</u>
	<u>\$50,165</u>	<u>\$64,310</u>

Concentration of Credit Risk

Financial instruments which potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, short-term investments and accounts receivable. Cash and cash equivalents and short-term investments consist principally of demand deposit and money market accounts, commercial paper and corporate debentures and bonds with credit ratings of AA or better. Cash and cash equivalents and short-term investments are principally held with various domestic financial institutions with high credit standing. As of December 31, 2007 and 2006, receivables from customers in international territories represented 63% and 48%, respectively, of accounts receivable.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our investment portfolio and long-term debt. We do not use derivative financial instruments in our investment portfolio. We do not hold financial instruments for trading or speculative purposes. We manage our interest rate risk by maintaining an investment portfolio primarily consisting of debt instruments of high credit quality and relatively short average maturities. Our cash and cash equivalents and short-term investments are not subject to material interest rate risk due to their short maturities. Under our investment policy, short-term investments have a maximum maturity of one year from the date of acquisition, and the average maturity of the portfolio cannot exceed six months. Due to the relatively short maturity of the portfolio, a 10% increase in market interest rates at December 31, 2007 would decrease the fair value of the portfolio by less than \$0.1 million.

As of December 31, 2007, our outstanding long-term debt balance was \$19.1 million. Interest on our long-term debt accrues on the unpaid principal balance at a variable interest rate (which adjusts every six months) equal to the sum of the LIBOR rate plus 3.0% per annum; provided that in no event will the variable interest rate (a) exceed 14.2488% per annum, (b) be less than 6.5% per annum, or (c) be adjusted by more than 1.0% at any adjustment date. Assuming the outstanding balance on our variable rate long-term debt remains constant over a year, a 2% increase in the interest rate would decrease pre-tax income and cash flow by approximately \$0.4 million.

Foreign Currency Risk

We transact business in various foreign countries. Substantially all of our assets are located in the United States. We have sales operations throughout Europe, Asia, the Middle East and Latin America. We are exposed to foreign currency exchange rate risk associated with foreign currency denominated assets and liabilities, primarily inter-company receivables and payables. Accordingly, our operating results are exposed to changes in exchange rates between the U.S. dollar and those currencies. During 2007 and 2006, we did not hedge any of our foreign currency exposure. During 2007 and 2006, we recorded a \$0.1 million foreign exchange loss and a \$0.2 million foreign exchange gain, respectively, in other income (expense) on our statements of operations.

We have performed sensitivity analyses as of December 31, 2007 and 2006, using a modeling technique that measures the change in the fair values arising from a hypothetical 10% adverse movement in the levels of foreign currency exchange rates relative to the U.S. dollar, with all other variables held constant. The sensitivity analyses indicated that a hypothetical 10% adverse movement in foreign currency exchange rates would result in a foreign exchange loss of \$1.3 million and \$1.2 million at December 31, 2007 and 2006, respectively. This sensitivity analysis assumes a parallel adverse shift in foreign currency exchange rates, which do not always move in the same direction. Actual results may differ materially.

ZHONE TECHNOLOGIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(1) Organization and Summary of Significant Accounting Policies

(a) Description of Business

Zhone Technologies, Inc. (sometimes referred to, collectively with its subsidiaries, as “Zhone” or the “Company”) designs, develops and manufactures communications network equipment for telephone companies and cable operators worldwide. The Company’s products allow network service providers to deliver video and interactive entertainment services in addition to their existing voice and data service offerings. The Company was incorporated under the laws of the state of Delaware in June 1999. The Company began operations in September 1999 and is headquartered in Oakland, California.

(b) Basis of Presentation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant inter-company transactions and balances have been eliminated in consolidation.

(c) Use of Estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ materially from those estimates.

(d) Revenue Recognition

The Company recognizes revenue when the earnings process is complete. The Company recognizes product revenue upon shipment of product under contractual terms which transfer title to customers upon shipment, under normal credit terms, net of estimated sales returns and allowances at the time of shipment. Revenue is deferred if there are significant post-delivery obligations, if collection is not considered reasonably assured at the time of sale, or if the fees are not fixed or determinable. When significant post-delivery obligations exist, revenue is deferred until such obligations are fulfilled. The Company’s arrangements generally do not have any significant post-delivery obligations. The Company offers products and services such as support, education and training, hardware upgrades and post-warranty support. For multiple element revenue arrangements, the Company establishes the fair value of these products and services based primarily on sales prices when the products and services are sold separately. If fair value cannot be established for undelivered elements, all of the revenue under the arrangement is deferred until those elements have been delivered. When collectibility is not reasonably assured, revenue is recognized when cash is collected. Revenue from education services and support services is recognized over the contract term or as the service is performed. The Company makes certain sales to product distributors. These customers are given certain privileges to return a portion of inventory. Return privileges generally allow distributors to return inventory based on a percent of purchases made within a specific period of time. The Company recognizes revenue on sales to distributors that have contractual return rights when the products have been sold by the distributors, unless there is sufficient customer specific sales and sales returns history to support revenue recognition upon shipment. In those instances when shipments made to distributors are recognized upon shipment of the products from the factory, the Company uses historical rates of return from the distributors to provide for estimated products return in accordance with Statement of Financial Accounting Standards (“SFAS”) No. 48, *Revenue Recognition When Right of Return Exists*. The Company accrues for warranty costs, sales returns, and other allowances at the time of shipment based on historical experience and expected future costs. In accordance with the provisions of Emerging Issues Task

Force Issue No. 06-3 (EITF 06-3), *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That is, Gross versus Net Presentation)*, the Company nets sales taxes against revenue.

(e) Allowances for Sales Returns and Doubtful Accounts

The Company records an allowance for sales returns for estimated future product returns related to current period product revenue. The allowance is recorded as a reduction of revenues in the Company's consolidated financial statements. The Company bases its allowance on periodic assessments of historical trends in product return rates and current approved returned products. If the actual future returns were to deviate from the historical data on which the reserve had been established, the Company's revenue could be adversely affected.

The Company records an allowance for doubtful accounts for estimated losses resulting from the inability of customers to make payments. The allowance is recorded as a general and administrative expense in the Company's consolidated financial statements. The Company bases its allowance on periodic assessments of its customers' liquidity and financial condition through analysis of information obtained from credit rating agencies, financial statement review and historical collection trends. Additional allowances may be required if the liquidity or financial condition of its customers were to deteriorate.

Activity under the Company's allowance for sales returns and doubtful accounts was comprised as follows (in thousands):

	<u>Year ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Balance at beginning of year	\$ 6,939	\$ 5,643	\$ 4,990
Charged to revenue	2,728	5,574	1,719
Charged to expenses	577	1,064	45
Utilization	(4,303)	(5,342)	(2,616)
Allowance from acquired companies	—	—	1,505
Balance at end of year	<u>\$ 5,941</u>	<u>\$ 6,939</u>	<u>\$ 5,643</u>

The allowance for doubtful accounts was \$4.3 million and \$4.3 million as of December 31, 2007 and 2006, respectively.

(f) Inventories

Inventories are stated at the lower of cost or market, with cost being determined using the first-in, first-out (FIFO) method. In assessing the net realizable value of inventories, the Company is required to make judgments as to future demand requirements and compare these with the current or committed inventory levels. Once inventory has been written down to its estimated net realizable value, its carrying value cannot be increased due to subsequent changes in demand forecasts. To the extent that a severe decline in forecasted demand occurs, or the Company experiences a higher incidence of inventory obsolescence due to rapidly changing technology and customer requirements, the Company may incur significant charges for excess inventory.

(g) Operating Lease Liabilities

As a result of the acquisition of Paradyne in September 2005, the Company assumed certain lease liabilities for facilities in Largo, Florida. In accordance with Emerging Issues Task Force Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination* (EITF 95-3), the Company accrued a liability for the excess portion of these facilities. The computation of the estimated liability

includes a number of assumptions and subjective variables. These variables include the level and timing of future sublease income, amount of contractual variable costs, future market rental rates, discount rate, and other estimated expenses. If circumstances change, and the Company employs different assumptions in future periods, the future lease liability may differ significantly from what the Company has recorded in the current period and could materially affect its net loss and net loss per share.

(h) Foreign Currency Translation

For operations outside the United States, the Company translates assets and liabilities of foreign subsidiaries, whose functional currency is the local currency, at end of period exchange rates. Revenues and expenses are translated at monthly average rates of exchange prevailing during the year. The adjustment resulting from translating the financial statements of such foreign subsidiaries, is included in accumulated other comprehensive income (loss), which is reflected as a separate component of stockholders' equity. Realized gains and losses on foreign currency transactions are included in other income (expense) in the accompanying consolidated statement of operations. During 2007 and 2006, the Company recorded a \$0.1 million realized foreign exchange loss and a \$0.1 million realized foreign exchange gain, respectively, in other income (expense) on its statements of operations.

(i) Cash and Cash Equivalents, and Short-Term Investments

The Company considers all cash and highly liquid investments purchased with an original maturity of less than three months to be cash equivalents.

Short-term investments include securities with original maturities greater than three months and less than one year and are available for use in current operations or other activities. Short-term investments consist principally of commercial paper, corporate debentures and bonds. Short-term investments have been classified as available for sale. Under this classification, the investments are reported at fair value, with unrealized gains and losses excluded from results of operations and reported, net of tax, as a component of other comprehensive loss in stockholders' equity. Realized gains and losses and declines in value judged to be other than temporary are included in results of operations. Gains and losses from the sale of securities are based on the specific-identification method.

Cash, cash equivalents, and short-term investments consisted of the following as of December 31, 2007 (in thousands):

	<u>Cost</u>	<u>Unrealized Gain</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>
Cash and Cash Equivalents:				
Cash	\$13,674	\$—	\$—	\$13,674
Money Market Funds	20,491	—	—	20,491
Commercial Paper	3,638	1	—	3,639
	<u>\$37,803</u>	<u>\$ 1</u>	<u>\$—</u>	<u>\$37,804</u>
Short-term investments:				
Commercial Paper	\$ 6,082	\$ 4	\$—	\$ 6,086
US Agency Securities	900	—	—	900
Corporate Securities	5,370	6	(1)	5,375
	<u>\$12,352</u>	<u>\$ 10</u>	<u>\$ (1)</u>	<u>\$12,361</u>

Cash, cash equivalents, and short-term investments consisted of the following as of December 31, 2006 (in thousands):

	<u>Cost</u>	<u>Unrealized Gain</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>
Cash and Cash Equivalents:				
Cash	\$13,176	\$—	\$—	\$13,176
Money Market Funds	18,256	—	—	18,256
Commercial Paper	15,540	1	—	15,541
	<u>\$46,972</u>	<u>\$ 1</u>	<u>\$—</u>	<u>\$46,973</u>
Short-term investments:				
Commercial Paper	\$ 4,877	\$—	\$—	\$ 4,877
US Agency Securities	10,570	2	(1)	10,571
Corporate Securities	1,888	1	—	1,889
	<u>\$17,335</u>	<u>\$ 3</u>	<u>\$ (1)</u>	<u>\$17,337</u>

(j) Fair Value of Financial Instruments

The carrying amounts of the Company's consolidated financial instruments which include cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate their fair values as of December 31, 2007 and 2006 due to the relatively short maturities of these instruments. The carrying value of the Company's debt obligations at December 31, 2007 and 2006 approximate fair value.

(k) Concentration of Risk

Financial instruments which potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents and accounts receivable. Cash and cash equivalents consist principally of demand deposit and money market accounts, commercial paper and debt securities of domestic municipalities with credit ratings of AA or better. Cash and cash equivalents are principally held with various domestic financial institutions with high credit standing. The Company's customers include competitive and incumbent local exchange carriers, competitive access providers, internet service providers, wireless carriers, and resellers serving these markets. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. Allowances are maintained for potential doubtful accounts. As of December 31, 2007 and 2006, receivables from customers in international territories represented 63% and 48%, respectively, of accounts receivable.

The Company may provide or commit to extend credit or credit support to certain customers. During the years ended December 31, 2007 and 2006, the Company sold \$2.0 million and \$10.3 million, respectively, of customer trade receivables to financial institutions on a non-recourse basis in exchange for cash. The sale of the receivables did not represent a securitization, and there was no continuing involvement or interests in the receivables by the Company after the sale. As of December 31, 2007, the Company did not have any significant customer financing commitments or guarantees.

The Company's products are concentrated in the communications equipment market, which is highly competitive and subject to rapid change. Significant technological changes in the industry could adversely affect operating results. The Company's inventories include components that may be specialized in nature, and subject to rapid technological obsolescence. The Company actively manages inventory levels, and the Company considers technological obsolescence and potential changes in product demand based on macroeconomic conditions when estimating required allowances to reduce recorded inventory amounts to market value. Such estimates could change in the future.

The Company's growth and ability to meet customer demands are also dependent on its ability to obtain timely deliveries of components from suppliers and contract manufacturers. The Company depends

on contract manufacturers and sole or limited source suppliers for several key components. If the Company were unable to obtain these components on a timely basis, the Company would be unable to meet its customers' product delivery requirements which could adversely impact operating results. While the Company is not solely dependent on one contract manufacturer, it expects to continue to rely on contract manufacturers to fulfill a portion of its product manufacturing requirements.

(l) Property and Equipment

Property and equipment are stated at cost and depreciated using the straight-line method over their estimated useful lives. Useful life for buildings is 30 years. Useful lives for laboratory and manufacturing equipment range from 10 to 30 years. Useful lives of all other property and equipment range from 3 to 5 years. Leasehold improvements are amortized over the shorter of 2 years or the remaining lease term.

(m) Goodwill

Costs in excess of the fair value of tangible and identifiable intangible assets acquired and liabilities assumed in a purchase business combination are recorded as goodwill. SFAS No. 142, *Goodwill and Other Intangible Assets*, requires that companies test for goodwill impairment at least annually using a two-step approach. The Company evaluates goodwill on an annual basis in November, at a minimum, and whenever events and changes in circumstances suggest that the carrying amount may not be recoverable. Impairment of goodwill is tested at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. The Company has determined that it operates in a single segment with one operating unit. The Company performs the annual goodwill impairment test using the market approach. If the carrying amount of the reporting unit exceeds its fair value, indication of goodwill impairment exists and a second step is performed to measure the amount of impairment loss, if any. During the years ended December 31, 2007, 2006, and 2005, the Company recorded non-cash goodwill impairment charges of zero, \$110.5 million, and \$55.2 million, respectively, as discussed in Note 3.

(n) Purchased Intangibles and Other Long-Lived Assets

In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the Company reviews long-lived assets, including intangible assets other than goodwill, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be fully recoverable based on expected undiscounted cash flows attributable to that asset. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future net undiscounted cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Any assets to be disposed of would be separately presented in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and would no longer be depreciated. The assets and liabilities of a disposed group classified as held for sale would be presented separately in the appropriate asset and liability sections of the balance sheet.

During the years ended December 31, 2007, 2006, and 2005, the Company recorded non-cash impairment charges of zero, \$3.2 million, and \$46.9 million, respectively, related to the impairment of purchased technology, customer relationships and other amortizable intangibles as discussed in Note 3.

(o) Research and Product Development Expenditures

Costs related to research, design, and development of products are charged to research and product development expense as incurred. Costs for the development of new software and substantial enhancements to existing software are expensed as incurred until technological feasibility has been established, at which time any additional development costs would be capitalized. The Company's current process for developing

software is essentially completed concurrently with the establishment of technological feasibility; accordingly, no costs have been capitalized to date.

(p) Accounting for Stock-Based Compensation

On January 1, 2006, the Company adopted SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS 123R), which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors, including employee stock options and employee stock purchases under the Company's Employee Stock Purchase Plan based on estimated grant date fair values. SFAS 123R supersedes the Company's previous accounting under Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25). In March 2005, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 107 (SAB 107) relating to SFAS 123R. The Company has applied the provisions of SAB 107 in its adoption of SFAS 123R.

The Company adopted SFAS 123R using the modified prospective transition method, under which prior periods are not restated to reflect, and do not include, the impact of SFAS 123R. SFAS 123R requires companies to estimate the fair value of share-based payment awards on the date of grant using an option pricing model. The Company adopted the Black Scholes model to estimate the fair value of options. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's Consolidated Statement of Operations. Prior to the adoption of SFAS 123R, the Company accounted for stock-based awards to employees and directors using the intrinsic value method in accordance with APB 25 as allowed under SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), and adopted the pro forma disclosures required under SFAS 123.

Awards of stock options granted to consultants under the Company's share-based compensation plans are accounted for at fair value determined by using the Black Scholes option pricing model in accordance with Emerging Issues Task Force Issue No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or In Conjunction with Selling, Goods or Services* (EITF 96-18). These options are generally immediately exercisable and expire seven to ten years from the date of grant. The Company values non-employee options using the Black Scholes model. Non-employee options subject to vesting are valued as they become vested.

Fair value stock-based compensation expense under SFAS 123R for the year ended December 31, 2007 includes compensation expense for share-based payment awards granted prior to, but not yet vested as of December 31, 2005 based on the grant date fair value estimated in accordance with the pro-forma provisions of SFAS 123, and compensation expense for the share-based payment awards granted subsequent to December 31, 2005 based on the grant date fair value estimated in accordance with the provisions of SFAS 123R. In conjunction with the provisions of SFAS 123R, the Company changed its method of attributing the value of stock-based compensation to expense from the accelerated method to the straight line method. Compensation expense for all employee share-based payment awards granted on or prior to December 31, 2005 will continue to be recognized using the accelerated method while compensation expense for all share-based payment awards granted subsequent to December 31, 2005 is recognized using the straight line method.

Pro Forma Information Under SFAS 123 for Periods Prior to the Implementation of SFAS 123R

The following table illustrates the effect on net loss and net loss per share if the fair value-based method had been applied to all outstanding and unvested awards in each period (in thousands, except per share data):

	<u>Year ended December 31, 2005</u>
Net loss, as reported	\$(126,891)
Add: Stock-based compensation expense included in reported net loss	3,272
Deduct: Total stock-based compensation expense determined under fair value method for all awards	<u>(8,804)</u>
Pro forma net loss	<u><u>\$(132,423)</u></u>
Loss per share:	
As reported—basic and diluted	<u>\$ (1.13)</u>
Pro forma—basic and diluted	<u><u>\$ (1.18)</u></u>

See Note 6 for further information regarding the Company's stock-based compensation assumptions and expense.

(q) Income Taxes

The Company uses the asset and liability method to account for income taxes. Under this method, deferred tax assets and liabilities are determined based on differences between the financial reporting and the income tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates and laws that will be in effect when the differences are expected to reverse. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. The Company has recorded a full valuation allowance against its net deferred tax assets at December 31, 2007 and 2006 due to the significant uncertainty regarding whether the deferred tax assets will be realized.

(r) Net Loss per Common Share

Basic net loss per share is computed by dividing the net loss applicable to holders of common stock for the period by the weighted average number of shares of common stock outstanding during the period. The calculation of diluted net loss per share gives effect to common stock equivalents; however, potential common equivalent shares are excluded if their effect is antidilutive. Potential common equivalent shares are composed of common stock subject to repurchase rights and incremental shares of common equivalent shares issuable upon the exercise of stock options and warrants, and the conversion of convertible debt.

(s) Other Comprehensive Income (Loss)

Other comprehensive income (loss) is recorded directly to stockholders' equity and includes unrealized gains and losses which have been excluded from the consolidated statements of operations. These unrealized gains and losses consist of foreign currency translation adjustments and unrealized gains and losses on available-for-sale securities.

(t) Recent Accounting Pronouncements

SFAS 157 – Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes guidelines for measuring fair value and expands disclosures regarding fair

value measurements. SFAS 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. SFAS 157 is effective for fiscal years beginning after November 15, 2007 for financial assets and liabilities and for fiscal years beginning after November 15, 2008 for non-financial assets and liabilities. Earlier adoption is permitted, provided the Company has not yet issued financial statements, including for interim periods, for that fiscal year. The Company will be required to adopt SFAS 157 in its 2008 fiscal year for financial assets and liabilities and in its 2009 fiscal year for non-financial assets and liabilities. The Company is currently evaluating the impact of SFAS 157, but does not expect the adoption of SFAS 157 to have a material impact on its consolidated financial statements.

FIN 48 – Accounting for Uncertainty in Income Taxes

In July 2006, the FASB issued Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* (FIN 48), which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured, and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified on the balance sheet; and provides transition and interim period guidance, among other provisions. The Company was required to adopt FIN 48 in fiscal year 2007. The adoption of FIN 48 did not have a material impact on its consolidated financial statements.

SFAS 159 – Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS 159 is effective for the Company beginning in the first quarter of fiscal year 2008, although earlier adoption is permitted. The Company is currently evaluating the impact, if any, that the adoption of SFAS 159 will have on its consolidated financial statements.

SFAS 141R – Business Combinations

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R), which replaces SFAS No. 141. SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non controlling interest in the acquiree and the goodwill acquired. The Statement also establishes disclosure requirements which will enable users to evaluate the nature and financial effects of the business combination. SFAS 141R is effective for fiscal years beginning after December 15, 2008. The Company will be required to adopt SFAS 141R in its 2009 fiscal year. The Company is currently evaluating the impact, if any, that the adoption of SFAS 141R will have on its consolidated financial statements.

(u) Reclassifications

Certain reclassifications have been made to prior period balances in order to conform to the current period's presentation. These include the reclassification of stock-based compensation expense to the associated operating expense line items in the consolidated statement of operations; and, commencing with the first quarter of 2007, the reclassification of prior period balances relating to the Company's historical optical transport business as part of its balances relating to its legacy, services and other product category.

(2) Acquisitions

The consolidated financial statements include the operating results of each business from the date of acquisition. The Company records the estimated acquisition related liabilities at the date of acquisition. For each acquisition, amounts were allocated to purchased in-process research and development and intangible assets as described below.

Purchased In-Process Research and Development

The Company recorded charges for purchased in-process research and development of \$1.2 million during the year ended December 31, 2005. The amounts allocated to purchased in-process research and development were determined through established valuation techniques used in the high-technology communications industry and were expensed upon acquisition, because technological feasibility had not been established and no future alternative uses existed. The values assigned to purchased in-process research and development were determined by identifying the ongoing research projects for which technological feasibility had not been achieved and assessing the state of completion of the research and development effort. The most significant and uncertain assumptions that affected the valuations were market events and risks outside of the Company's control such as trends in technology, government regulations, market size and growth, and future product introduction by competitors.

The state of completion was determined by estimating the costs and time incurred to date relative to those costs and time to be incurred to develop the purchased in-process research and development into commercially viable products, estimating the resulting net cash flows only from the percentage of research and development efforts complete at the date of acquisition, and discounting the net cash flows back to their present value. The risk adjusted discount rate included a factor that took into account the uncertainty surrounding the successful development of the purchased in-process technology projects. Historical margins and expense levels were estimated to improve over time, assuming that the technology was successfully developed and the Company's ability to generate economies of scale and operating leverage as revenue continued to grow.

(a) Paradyne Networks, Inc.

In September 2005, the Company completed the acquisition of Paradyne Networks, Inc. ("Paradyne") in exchange for total consideration of \$184.5 million, consisting of common stock valued at \$164.1 million, options and warrants to purchase common stock valued at \$19.4 million, and acquisition costs of \$1.0 million. Common stock and options were valued using an average closing price as reported by Nasdaq for the two days immediately proceeding and following the announcement of the merger and the date of the announcement. The Company acquired Paradyne to strengthen its position as a leading provider of next-generation local access network solutions as well as increase its customer base. Paradyne had an existing contract with the Company to resell certain of the Company's products.

In September 2006, the purchase allocation was adjusted to reflect the Company's revised plan with respect to acquired excess facilities. The final purchase consideration was allocated as follows: net tangible assets—\$48.6 million, amortizable intangible assets—\$54.8 million, purchased in-process research and development—\$1.2 million, goodwill—\$79.0 million, and deferred compensation—\$0.9 million. The amount allocated to purchased in-process research and development was charged to expense during the third quarter of 2005, because technological feasibility had not been established and no future alternative uses for the technology existed. The estimated fair value of the purchased in-process research and development was determined using a discounted cash flow model, based on a discount rate which took into consideration the stage of completion and risks associated with developing the technology. Of the amount allocated to amortizable intangible assets, \$12.3 million was allocated to core technology and \$10.1 million was allocated to patents, both of which were assigned an estimated useful life of five years. Of the remaining \$32.4 million, \$3.3 million was allocated to backlog and \$29.1 million was allocated to customer relationships, which were assigned estimated useful lives of six months and seven years, respectively.

Net tangible assets acquired consisted of total assets of \$71.4 million, of which \$70.4 million were current, offset by assumed liabilities of \$22.8 million. Assumed liabilities included employee severance and estimated exit costs which were recorded based on Emerging Issues Task Force Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination* (EITF 95-3). As a result of the Paradyne acquisition, the Company assumed a lease commitment for facilities in Largo, Florida. The term of the lease expires in June 2012 and had an estimated remaining obligation of approximately \$21.7 million as of

December 31, 2007, of which \$3.7 million was accrued for excess facilities, which is net of estimated sublease income. In September 2006, the Company updated its plan to exit the excess portion of these facilities and has recorded an adjustment to the purchase price allocation of \$1.0 million to increase the assumed liabilities relating to this lease. During the year ended December 31, 2007, the Company updated its estimated sublease assumptions and recorded an additional adjustment of \$0.5 million to increase the assumed liabilities relating to this lease. A summary of period activity related to severance and exit costs accrued in accordance with EITF 95-3 is as follows (in thousands):

	<u>Severance</u>	<u>Exit Costs</u>	<u>Total</u>
Liability recorded at acquisition date	\$ 5,080	\$ 7,670	\$12,750
Net cash payments	<u>(4,670)</u>	<u>(1,904)</u>	<u>(6,574)</u>
Balance at December 31, 2005	410	5,766	6,176
Adjustment	—	1,010	1,010
Net cash payments	<u>(410)</u>	<u>(2,245)</u>	<u>(2,655)</u>
Balance at December 31, 2006	\$ —	\$ 4,531	\$ 4,531
Adjustment	—	477	477
Net cash payments	<u>—</u>	<u>(1,313)</u>	<u>(1,313)</u>
Balance at December 31, 2007	<u>\$ —</u>	<u>\$ 3,695</u>	<u>\$ 3,695</u>

A summary of the assumed lease liabilities related to excess facilities at their net present value is as follows (in thousands):

	<u>Exit Costs</u>
Future lease payments	\$ 7,870
Less: contractual sublease income	(2,457)
Less: estimated sublease income	(1,934)
Other sublease expenses	<u>216</u>
Balance at December 31, 2007	<u>\$ 3,695</u>

(b) Pro forma Combined Results of Operations

The Company's results of operations include the results of operations for Paradyne from September 2005 following the consummation of the merger. The following table reflects the unaudited pro forma combined results of operations of the Company on the basis that the acquisition of Paradyne took place at the beginning of 2005 (in thousands, except per share amounts):

	<u>2005</u>
Net revenue	\$ 223,128
Net loss	(139,267)
Net loss per share—basic and diluted	(0.95)
Number of shares used in computation—basic and diluted	146,727

The pro forma financial information is not necessarily indicative of the operating results that would have occurred, had the acquisitions been consummated as of the beginning of each year presented, nor are they necessarily indicative of future operating results.

(3) Long-lived Assets, Goodwill and Other Acquisition-Related Intangible Assets

The Company tests goodwill for impairment using a two step approach on an annual basis in November, or when certain indicators of impairment exist in accordance with SFAS No. 142, *Goodwill and Other Intangible*

Assets. Impairment of goodwill is tested at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit using the market approach. The Company has determined that it operates in a single segment with one operating unit. If the carrying amount of the reporting unit exceeds its fair value, a second step is performed to measure the amount of impairment loss, if any. In 2006 and 2005, the Company determined that such indicators of impairment existed and the second step was performed, resulting in a goodwill impairment loss of \$110.5 million and \$55.2 million, respectively.

Changes in the carrying amount of goodwill were as follows (in thousands):

	Year ended December 31,	
	2007	2006
Beginning balance	\$70,737	\$ 180,001
Impairment of goodwill	—	(110,470)
Other adjustments	(336)	1,206
Ending balance	<u>\$70,401</u>	<u>\$ 70,737</u>

In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long Lived Assets*, the Company reviews long-lived assets, including intangible assets other than goodwill, for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable based on expected undiscounted cash flows attributable to that asset. The amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset.

The Company estimates the fair value of its long-lived assets based on a combination of the market, income and replacement cost approaches. In the application of the impairment testing, the Company is required to make estimates of future operating trends and resulting cash flows and judgments on discount rates and other variables. Actual future results and other assumed variables could differ from these estimates. During the third quarter of 2006, the Company determined that indicators of impairment existed and an impairment analysis was performed, resulting in an impairment loss to amortizable intangibles of \$3.2 million. During the fourth quarter of 2005, the Company recorded a non-cash impairment charge of \$46.9 million related to acquired intangibles consisting of customer lists and developed technology. The primary circumstance leading to the impairment of these intangibles was a decline in the Company's projected future cash flows associated with customers and technology attributable to the Company's prior acquisitions. As a result of the impairment charges, the Company's amortizable intangibles at December 31, 2007 and 2006 were zero.

Changes in the carrying amount of intangible assets were as follows (in thousands):

	Year Ended December 31,	
	2007	2006
Beginning net book value	\$ —	\$14,638
Amortization	—	(2,764)
Impairment of intangible assets	—	(3,196)
Sale of intangible assets	—	(8,678)
Ending net book value	<u>\$ —</u>	<u>\$ —</u>

Sale of Intangible Assets

During the third quarter of 2007, the Company sold some of its non-strategic patents for \$5.0 million. The resulting \$5.0 million gain was recorded within operating income as gain on sale of intangible assets. During the second quarter of 2006, the Company sold some of its non-strategic patents for \$9.0 million, resulting in a gain of \$0.3 million, which was recorded within general and administrative operating expenses.

Sale of Land

During the second quarter of 2007, the Company completed the sale of approximately 3.625 acres of undeveloped land at a price of \$1.5 million to the Redevelopment Agency of the City of Oakland pursuant to a repurchase option exercised by it. No gain or loss was recorded on the sale.

Sale of Access Node Fixed Assets

In December 2007, the Company sold its Access Node legacy product line to a third party. In addition to sale of inventory, the Company also sold fixed assets related to the Access Node legacy product line. Upon sale of the fixed assets, the Company recorded a gain of \$0.7 million.

(4) Balance Sheet Detail

Balance sheet detail as of December 31, 2007 and 2006 is as follows (in thousands):

	<u>2007</u>	<u>2006</u>
Inventories:		
Raw materials	\$33,479	\$30,452
Work in process	5,194	10,392
Finished goods	6,025	4,192
	<u>\$44,698</u>	<u>\$45,036</u>
Property and equipment:		
Land	\$ 4,821	\$ 6,321
Buildings	14,007	14,007
Machinery and equipment	7,729	6,838
Computers and acquired software	3,401	3,438
Furniture and fixtures	389	411
Leasehold improvements	378	352
	<u>30,725</u>	<u>31,367</u>
Less accumulated depreciation and amortization	9,907	7,663
	<u>\$20,818</u>	<u>\$23,704</u>

Depreciation and amortization expense associated with property and equipment amounted to \$2.7 million, \$2.6 million and \$1.8 million for the years ended December 31, 2007, 2006 and 2005, respectively.

	<u>2007</u>	<u>2006</u>
Accrued and other liabilities (in thousands):		
Accrued contract manufacturing costs	\$ 14	\$ 81
Accrued warranty	2,487	3,128
Accrued compensation	3,051	3,027
Accrued severance and exit costs	3,695	4,531
Deferred revenue	656	619
Other	7,985	8,702
	<u>\$17,888</u>	<u>\$20,088</u>

The Company accrues for warranty costs based on historical trends for the expected material and labor costs to provide warranty services. Warranty periods are generally one year from the date of shipment. The following table summarizes the activity related to the product warranty liability during the years ended December 31, 2007 and 2006 (in thousands):

Balance at December 31, 2005	\$ 5,247
Charged to operations	2,212
Claims/settlements	<u>(4,331)</u>
Balance at December 31, 2006	\$ 3,128
Charged to operations	2,410
Claims/settlements	<u>(3,051)</u>
Balance at December 31, 2007	<u>\$ 2,487</u>

(5) Debt

Long-term debt

Long-term debt consisted of the following as of December 31, 2007 and 2006 (in thousands):

	<u>2007</u>	<u>2006</u>
Secured real estate loan due April 2011	\$19,405	\$19,639
Convertible debentures assumed in Sorrento acquisition due August 2007	—	7,410
	<u>19,405</u>	<u>27,049</u>
Less current portion of long-term debt	<u>265</u>	<u>7,673</u>
	<u>\$19,140</u>	<u>\$19,376</u>

Aggregate debt maturities as of December 31, 2007 are \$0.3 million in each of fiscal 2008, 2009, 2010 and \$18.4 million in fiscal 2011.

Secured Real Estate Loan

In December 2005, the Company entered into an amendment to an existing loan with a financial institution relating to the financing of its Oakland, California campus (the "Amended Loan"). Under the Amended Loan, (a) the outstanding principal balance was paid down from approximately \$31.1 million to approximately \$20.0 million, (b) the maturity date was extended five years to April 1, 2011, (c) the floor rate was reduced from 8.0% per annum to 6.5% per annum, (d) the variable rate margin was reduced from 3.5% per annum to 3.0% per annum, (e) the amortization period for purposes of calculating monthly principal payments was amended to a period of 25 years commencing on January 1, 2006, and (f) the financial institution cancelled the Company's \$6.0 million letter of credit. Interest accrues on the unpaid principal balance at a variable interest rate (which adjusts every six months) equal to the sum of the LIBOR rate plus 3.0% per annum; provided that in no event will the variable interest rate (a) exceed 14.2488% per annum, (b) be less than 6.5% per annum, or (c) be adjusted by more than 1.0% at any adjustment date. The Company is obligated to make monthly payments of principal and interest in an amount which fully amortizes the then unpaid principal balance of the loan and interest accruing thereon at the interest rate in effect in equal monthly installments over the remaining term of the amortization period. The interest rate on this debt was 8.1% as of December 31, 2007. The Company's obligations under the Amended Loan remain secured by a security interest in the Company's campus. As of December 31, 2007 and 2006, the debt was collateralized by land and buildings with a net book value of \$16.5 million and \$18.5 million, respectively.

Convertible Debentures

In July 2004, the Company assumed convertible debentures of \$11.7 million in connection with the acquisition of Sorrento, with an interest rate of 7.5%. During 2006, the Company made a voluntary repayment of \$1.5 million relating to the convertible debenture debt. On August 2, 2007, the convertible debentures matured and the Company repaid the outstanding principal amount of \$7.4 million plus accrued interest. The debentures were convertible into common stock at the option of the holder at a conversion price of \$6.02 per share. No holders elected to convert their debentures into common stock.

Credit Facility

The Company has a revolving line of credit and letter of credit facility and an accounts receivable purchase facility with Silicon Valley Bank (the "SVB Facilities"). Under the facilities, the Company has the option of borrowing funds at agreed upon rates of interest, so long as the aggregate amount of outstanding borrowings does not exceed \$25.0 million. In addition, the Company may sell specific accounts receivables to Silicon Valley Bank, on a non recourse basis, at agreed upon discounts to the face amount of those accounts receivables, so long as the aggregate amount of outstanding accounts receivables does not exceed \$10.0 million. The SVB Facilities are renewed on an annual basis, and are currently scheduled to expire in March 2009.

Under these facilities, \$15.0 million and \$14.5 million were outstanding at December 31, 2007 and 2006, respectively, and an additional \$6.5 million was committed as security for various letters of credit as of December 31, 2007. The amounts borrowed under the revolving credit facility bear interest, payable monthly, at a floating rate that, at the Company's option, is either (1) Silicon Valley Bank's prime rate, or (2) the sum of the LIBOR rate plus 2.9%; provided that in either case, the minimum interest rate is 4.0%. The interest rate was 7.25% at December 31, 2007.

The Company's obligations under the SVB Facilities are secured by substantially all of the Company's personal property assets and those of its subsidiaries, including their intellectual property. The SVB Facilities contain certain financial covenants, and customary affirmative covenants and negative covenants. If the Company does not comply with the various covenants and other requirements under the SVB Facilities, Silicon Valley Bank is entitled to, among other things, require the immediate repayment of all outstanding amounts and sell the Company's assets to satisfy the obligations under the SVB Facilities. As of December 31, 2007, the Company was in compliance with these covenants.

(6) Stockholders' Equity

(a) Overview

As of December 31, 2007 and 2006, the Company's equity capitalization consisted of 900 million authorized shares of common stock, of which 150.0 million and 149.3 million, respectively, were outstanding.

(b) Warrants

At December 31, 2007, the Company had a total of 2.2 million warrants to purchase common stock outstanding at a weighted average exercise price of \$4.20 per share. Of these, 2.15 million fully vested warrants were assumed through the Company's acquisition of Sorrento Networks Corporation ("Sorrento") in July 2004 at a weighted average exercise price of \$3.88 per share. These warrants were valued using the Black-Scholes option pricing model and the resulting fair value of \$7.1 million was included in the purchase price for the acquisition. No warrants were exercised in 2007. The warrants will expire in the years 2008 through 2014.

In September 2005, through the acquisition of Paradyne, the Company assumed a fully vested warrant to purchase 1.1 million shares of the Company's common stock at an exercise price of \$5.42 per share. This warrant was valued using the Black-Scholes option pricing model. The resulting fair value was minimal as the warrant's exercise price was higher than market price and the warrant's term was only four months. This warrant expired unexercised on December 31, 2005.

(c) Stock-Based Compensation

As of December 31, 2007, the Company had two types of share-based compensation plans related to stock options and employee stock purchases. The compensation cost that has been charged as an expense in the statement of operations for those plans was \$2.9 million, \$5.5 million and \$3.3 million for the years ended December 31, 2007, 2006 and 2005, respectively.

The following table summarizes stock-based compensation expense for the years ended December 31, 2007, 2006 and 2005 (in thousands):

	Year ended December 31,		
	2007	2006	2005
Amortization of deferred stock-based compensation (intrinsic value)	\$ —	\$ —	\$ 653
Stock-based compensation under SFAS 123R	2,603	5,180	—
Compensation expense relating to non-employees	49	10	2,638
Benefit due to reversal of previously recorded stock compensation	—	—	(19)
Compensation expense relating to Employee Stock Purchase Plan	214	315	—
Stock-based compensation expense	<u>\$2,866</u>	<u>\$5,505</u>	<u>\$3,272</u>

Stock Options

The share-based compensation plans are designed to attract, motivate, retain and reward talented employees, directors and consultants and align stockholder and employee interests. The Company has two active plans, the Amended and Restated Special 2001 Stock Incentive Plan and the Amended and Restated 2001 Stock Incentive Plan. Stock options are primarily issued from the Amended and Restated 2001 Stock Incentive Plan. This plan provides for the grant of incentive stock options, non-statutory stock options, restricted stock awards and other stock-based awards to officers, employees, directors and consultants of the Company. Options may be granted at an exercise price less than, equal to or greater than the fair market value on the date of grant, except that any options granted to a 10% stockholder must have an exercise price equal to at least 110% of the fair market value of the Company's common stock on the date of grant. The Board of Directors determines the term of each option, the option exercise price and the vesting terms. Stock options are generally granted at an exercise price equal to the fair market value on the date of grant, expiring seven to ten years from the date of grant and vesting over a period of four years. On January 1 of each year, if the number of shares available for grant under the Amended and Restated 2001 Stock Incentive Plan is less than 5% of the total number of shares of common stock outstanding as of that date, the shares available for grant under the plan are automatically increased by the amount necessary to make the total number of shares available for grant equal to 5% of the total number of shares of common stock outstanding, or by a lesser amount as determined by the Board of Directors. As of December 31, 2007, 4.5 million shares were available for grant under these plans.

Through the acquisition of Paradyne in September 2005 and Sorrento in July 2004, the Company assumed several stock option plans, including the Amended and Restated 1996 Equity Incentive Plan, the 1999 Non-Employee Directors' Stock Option Plan, the 2000 Broad-Based Stock Plan, the Amended and Restated Osicom Technologies, Inc. 1997 Incentive and Non-Qualified Stock Option Plan, Sorrento Networks Corporation 2000 Stock Incentive Plan and the 2003 Equity Incentive Plan. In February 2006, the Company amended and froze these plans as well as the Zhone Technologies, Inc. 1999 Stock Option Plan and the 2002 Stock Incentive Plan to provide that no further awards be made under these plans. As a result of this amendment, approximately 12.4 million shares were no longer available for grant. During the year ended December 31, 2007 and 2006, there were cancelled shares relating to plans which were frozen and therefore unavailable for grant of 1.7 million and 2.5 million, respectively.

The Company has estimated the fair value of stock-based payment awards on the date of grant using the Black Scholes pricing model, which is affected by the Company's stock price as well as assumptions regarding a

number of complex and subjective variables. These variables include the Company's expected stock price volatility over the term of the awards, actual and projected employee option exercise behaviors, risk free interest rate and expected dividends. The estimated expected term of options granted was determined based on historical option exercise trends. Estimated volatility was based on historical volatility as well as peer group data and the risk free interest rate was based on U.S. Treasury yield in effect at the time of grant for the expected life of the options. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore used an expected dividend yield of zero in the option valuation model. The Company is also required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. Historical data was used to estimate pre-vesting forfeitures and record stock-based compensation expense only for those awards that are expected to vest.

The assumptions used to value option grants for the years ended December 31, 2007, 2006 and 2005 are as follows:

	Year ended December 31,		
	2007	2006	2005
Expected term	4.7 years	4.9 years	4.0 years
Expected volatility	60%	73%	73%
Risk free interest rate	4.13%	4.7%	4.1%

The weighted average grant date fair value of options granted during the years ended December 31, 2007, 2006 and 2005 was \$0.68, \$1.10 and \$1.65 per share, respectively. The intrinsic value of options exercised for the years ended December 31, 2007, 2006 and 2005 was \$0.08 million, \$0.8 million and \$1.1 million, respectively. For the years ended December 31, 2007, 2006 and 2005, the Company received \$0.01 million, \$1.4 million and \$2.3 million in proceeds from stock option exercises, respectively.

The following table sets forth the summary of option activity under the stock option program for the year ended December 31, 2007 (in thousands, except per share data):

	<u>Options Outstanding</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value</u>
Outstanding as of December 31, 2006	25,141	\$4.56	5.76	\$553
Granted	3,865	\$1.27		
Canceled/Forfeited	(3,999)	\$3.61		
Exercised	(68)	\$.21		
Outstanding as of December 31, 2007	<u>24,939</u>	\$4.21	4.92	\$406
Vested and expected to vest at				
December 31, 2007	<u>22,425</u>	\$4.49	4.72	\$406
Vested and exercisable at				
December 31, 2007	<u>17,628</u>	\$5.24	4.18	\$406

The aggregate intrinsic value represents the total pretax intrinsic value, based on the Company's closing stock price as of December 31, 2007 of \$1.17, which would have been received by the option holders had the option holders exercised their options as of that date.

As of December 31, 2007, there was \$5.0 million of unrecognized compensation costs, adjusted for estimated forfeitures related to unvested stock-based payments granted which are expected to be recognized over a weighted average period of 2.0 years.

Employee Stock Purchase Plan

The Company's 2002 Employee Stock Purchase Plan ("ESPP") allows eligible employee participants to purchase shares of the Company's common stock at a price equal to 85% of the lower of the fair market value of the common stock at the beginning or the end of each offering period. Participation is limited to 10% of an employee's eligible compensation, not to exceed amounts allowed by the Internal Revenue Code. During the second quarter of 2006, the number of available shares under the ESPP was increased by 2.0 million. At September 1, 2005, the Company changed from a six month offering period to a three month offering period under the ESPP. The following table summarizes shares purchased, weighted average purchase price, cash received and the aggregate intrinsic value for ESPP purchases during the years ended December 31, 2007, 2006 and 2005 (in thousands, except per share data):

	<u>Year ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Shares purchased	641	581	372
Weighted average purchase price	\$1.02	\$1.49	\$2.18
Cash received	\$ 653	\$ 867	\$ 812
Aggregate intrinsic value	\$ 182	\$ 351	\$ 174

The assumptions used to value stock purchases under the Company's ESPP for the years ended December 31, 2007, 2006 and 2005 are as follows:

	<u>Year ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Expected term	3 months	3 months	7.6 months
Volatility	60%	57%	77%
Risk free interest rate	4.7%	4.7%	1.9%
Weighted average fair value per share	\$0.35	\$0.54	\$1.16

(7) Net Loss Per Share

The following table sets forth the computation of basic and diluted net loss per share (in thousands, except per share data):

	<u>Year ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Numerator:			
Net loss	<u>\$ (12,102)</u>	<u>\$ (142,666)</u>	<u>\$ (126,891)</u>
Denominator:			
Weighted average common stock outstanding	149,623	148,727	112,077
Adjustment for common stock issued subject to repurchase	—	—	(73)
Denominator for basic and diluted calculation	<u>149,623</u>	<u>148,727</u>	<u>112,004</u>
Basic and diluted net loss per share	<u>\$ (0.08)</u>	<u>\$ (0.96)</u>	<u>\$ (1.13)</u>

The following table sets forth potential common stock that is not included in the diluted net loss per share calculation above because their effect would be anti-dilutive for the periods indicated (in thousands, except exercise price per share data):

	<u>2007</u>	<u>Weighted Average Exercise price</u>
Warrants	2,185	\$4.20
Outstanding stock options and unvested restricted shares	<u>24,977</u>	\$4.21
	<u>27,162</u>	
	<u>2006</u>	<u>Weighted Average Exercise price</u>
Warrants	2,716	\$4.68
Convertible debentures	1,231	6.02
Outstanding stock options	<u>25,141</u>	4.56
	<u>29,088</u>	
	<u>2005</u>	<u>Weighted Average Exercise price</u>
Weighted average common stock issued subject to repurchase	73	\$3.06
Warrants	2,716	4.69
Convertible debentures	1,473	6.02
Outstanding stock options	<u>24,708</u>	5.07
	<u>28,970</u>	

As of December 31, 2007 and 2006, there were zero shares of issued common stock subject to repurchase.

(8) Income Taxes

The following is a summary of the components of income tax expense applicable to net loss before income taxes (in thousands):

	<u>Year ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Current:			
Federal	\$—	\$—	\$—
State	150	117	95
Foreign	<u>244</u>	<u>147</u>	<u>120</u>
	394	264	215
Deferred:			
Federal	—	—	—
State	—	—	—
Foreign	<u>—</u>	<u>—</u>	<u>—</u>
	<u>\$394</u>	<u>\$264</u>	<u>\$215</u>

A reconciliation of the expected tax expense (benefit) to the actual tax expense is as follows (in thousands):

	<u>Year ended December 31,</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Expected tax benefit at statutory rate (35%)	\$(4,098)	\$(49,841)	\$(44,337)
State taxes, net of Federal effect	98	76	62
Goodwill amortization and impairment	—	38,665	19,338
Foreign rate differential	(1,474)	5,833	3,298
Valuation allowance	4,886	3,834	20,292
Stock-based compensation	948	1,615	1,037
Acquired in-process research and development	—	—	417
Other	34	82	108
	<u>\$ 394</u>	<u>\$ 264</u>	<u>\$ 215</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting and income tax purposes. Significant components of the Company's deferred tax assets and liabilities as of December 31, 2007 and 2006 are as follows (in thousands):

	<u>2007</u>	<u>2006</u>
Deferred assets:		
Net operating loss, capital loss, and tax credit carryforwards	\$ 478,835	\$ 451,782
Fixed assets and intangible assets	59,542	80,708
Inventory and other reserves	14,321	19,630
Other	120	832
Gross deferred tax assets	552,818	552,952
Less valuation allowance	<u>(552,818)</u>	<u>(552,952)</u>
Total deferred tax assets	<u>\$ —</u>	<u>\$ —</u>

The Company has established a valuation allowance to reduce the deferred tax assets to a level that the Company believes is more likely than not to be realized through future taxable income. Approximately \$359.2 million of the valuation allowance for deferred tax assets relates to various acquisitions, the benefit from which will be allocated first to goodwill rather than current tax expense if subsequently realized.

For the years ended December 31, 2007 and 2006, the net changes in the valuation allowance were a decrease of \$0.1 million and an increase of \$22.9 million, respectively. The Company recorded a full valuation allowance against the net deferred tax assets at December 31, 2007 and 2006 since it is more likely than not that the net deferred tax assets will not be realized due to the lack of previously paid taxes and anticipated taxable income.

As of December 31, 2007, the Company had net operating loss carryforwards for federal and California income tax purposes of approximately \$1,231.4 million and \$419.3 million, respectively, which are available to offset future taxable income, if any, in years through 2027 and 2017, respectively. Approximately \$2.9 million and \$1.9 million net operating loss carryforwards for federal and California income tax purposes, respectively, are attributable to employee stock option deductions, the benefit from which will be allocated to paid-in-capital rather than current income when subsequently recognized. Federal and state laws impose substantial restrictions on the utilization of net operating loss and tax credit carryforwards in the event of an ownership change for tax purposes, as defined in Section 382 of the Internal Revenue Code. As a result of such ownership changes, the Company's ability to realize the potential future benefit of tax losses and tax credits that existed at the time of the ownership change will be significantly reduced. The Company's deferred tax asset and related valuation allowance would be reduced as a result. The Company has not yet performed a Section 382 study to determine the amount of reduction, if any.

As of December 31, 2007, the Company also had research credit carryforwards for federal and state income tax purposes of approximately \$19.6 million and \$7.7 million, respectively, which are available to reduce future income taxes, if any, in years through 2027 and over an indefinite period, respectively. Additionally, the Company had alternative minimum tax credit carryforwards for federal income tax purposes of approximately \$0.1 million which are available to reduce future income taxes, if any, over an indefinite period. The Company also had enterprise zone credit carryforwards for state income tax purposes of approximately \$0.2 million which are available to reduce future state income taxes, if any, over an indefinite period.

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), on January 1, 2007. In accordance with the provisions of FIN 48, the total amount of unrecognized tax benefits, including interest and penalties, at December 31, 2007 is not material. The amount of tax benefits that would impact the effective rate, if recognized, is not expected to be material. However, the Company may have unrecognized tax benefits included in its deferred tax assets that have not yet been recognized due to a full valuation allowance as of December 31, 2007 and 2006. There were no significant changes to unrecognized tax benefits at the date of adoption or as of December 31, 2007. The Company does not anticipate any significant changes with respect to unrecognized tax benefits within the next 12 months.

Interest and penalties, to the extent accrued on unrecognized tax benefits in the future, will be included in tax expense.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. The open tax years for the major jurisdictions are as follows:

- | | |
|------------------------------|-------------|
| • Federal | 2004 – 2007 |
| • California and Canada | 2003 – 2007 |
| • Brazil | 2001 – 2007 |
| • Germany and United Kingdom | 2005 – 2007 |

However, due to the fact the Company had net operating losses and credits carried forward in most jurisdictions, certain items attributable to technically closed years are still subject to adjustment by the relevant taxing authority through an adjustment to tax attributes carried forward to open years.

In addition, to the extent the Company is deemed to have a sufficient connection to a particular taxing jurisdiction to enable that jurisdiction to tax the Company but the Company has not filed an income tax return in that jurisdiction for the year(s) at issue, the jurisdiction would typically be able to assert a tax liability for such years without limitation on the number of years it may examine.

The Company is not currently under examination for income taxes in any material jurisdiction.

(9) Related-Party Transactions

In July 2004, the Company completed the acquisition of Sorrento to obtain its line of optical transport products and enhance its competitive position with cable operators. One of the Company’s directors is a partner of a venture capital firm which is a significant stockholder of Zhone, and which also held warrants to purchase Sorrento common stock that were assumed by Zhone.

In the ordinary course of business, the Company’s executive officers and non-employee directors are reimbursed for travel related expenses when incurred for business purposes. The Company reimburses its Chairman, President and Chief Executive Officer, Morteza Ejabat, for the direct operating expenses incurred in the use of his private aircraft when used for business purposes. The amount reimbursed for these expenses was \$615,000, \$707,000 and \$753,000 during the years ended December 31, 2007, 2006 and 2005, respectively.

In July 2002, the Company loaned \$350,000 to Morteza Ejabat in connection with his purchase of 3,500,000 shares of common stock and \$200,000 to Jeanette Symons in connection with her purchase of 2,000,000 shares

of common stock. These loans were made pursuant to promissory notes which accrue interest at a rate of 5.5% per annum compounded annually and became due on July 11, 2006. During the third quarter of 2006, the outstanding principal amounts of the promissory notes and accrued interest were paid according to the original terms of the notes.

(10) Commitments and Contingencies

Operating Leases

The Company has entered into operating leases for certain office space and equipment, some of which contain renewal options.

Estimated future lease payments under all non-cancelable operating leases with terms in excess of one year, including taxes and services fees, are as follows (in thousands):

	<u>Operating leases</u>
Year ending December 31:	
2008	4,874
2009	4,597
2010	4,478
2011	4,478
2012	<u>4,453</u>
Total minimum lease payments	<u>\$22,880</u>

The total minimum lease payments shown above include projected payments and obligations for leases, some of which relate to excess facilities obtained through acquisitions. At December 31, 2007, the Company had estimated commitments of \$21.7 million related to facilities assumed as a result of the Paradyne acquisition, of which \$3.7 million was accrued for excess facilities in accrued liabilities as of December 31, 2007. For operating leases that include contractual commitments for operating expenses and maintenance, estimates of such amounts are included based on current rates. Rent expense under operating leases, excluding rent relating to excess facilities previously accrued, totaled \$4.9 million, \$4.0 million and \$1.9 million for the years ended December 31, 2007, 2006 and 2005, respectively. Sublease rental income totaled \$1.5 million, \$1.0 million and \$0.1 million for the years ended December 31, 2007, 2006 and 2005, respectively.

Other Commitments

The Company has agreements with various contract manufacturers which include inventory repurchase commitments for excess material based on the Company's sales forecasts. The Company has recorded a liability for estimated charges of \$0.01 million and \$0.08 million related to these arrangements as of December 31, 2007 and 2006, respectively.

The Company is currently under audit examination by several state taxing authorities for non income based taxes. The Company has reserved an estimated amount which the Company believes is sufficient to cover potential claims. However, there are certain examinations including those related to acquired entities, for which an amount cannot be reasonably estimated. In these instances, the examinations are still in the information gathering stage and no formal assessment has been made.

In connection with the acquisition of Sorrento in July 2004, the Company recorded assumed liabilities for possible contingencies related to the resolution of an employee defined benefit pension plan dispute. In 2000, Sorrento sold one of its subsidiaries to a third party. In connection with this transaction, the third party assumed all responsibility for a defined benefit plan for the employees of the Sorrento subsidiary that was sold to them. Although the third party is the sponsor of the benefit plan, it disclaims responsibility for the minimum funding

contributions to the benefit plan and insists that the Company is responsible for any liability related thereto. The Company has reserved an estimated amount which the Company believes is sufficient to cover potential claims regarding the resolution of the benefit plan dispute. The Company also acquired restricted cash of \$0.5 million related to the settlement of these claims. During 2007, the Company reclassified the \$0.5 million from restricted cash to other current assets as the Company expects to release these funds within one year.

Performance Bonds

In the normal course of operations, the Company arranges for the issuance of various types of surety bonds, such as bid and performance bonds, which are agreements under which the surety company guarantees that the Company will perform in accordance with contractual or legal obligations. If the Company fails to perform under its obligations, the maximum potential payment under these surety bonds would have been \$2.2 million as of December 31, 2007.

Royalties

The Company has certain royalty commitments associated with the shipment and licensing of certain products. Royalty expense is generally based on a dollar amount per unit shipped or a percentage of the underlying revenue.

(11) Litigation

Paradyne Matters

As a result of the acquisition of Paradyne, the Company became involved in various legal proceedings, claims and litigation, including those identified below, relating to the operations of Paradyne prior to the acquisition of Paradyne.

A purported stockholder class action complaint was filed in December 2001 in the United States District Court in the Southern District of New York against Paradyne, Paradyne's then-current directors and executive officers, and each of the underwriters (the "Underwriter Defendants") who participated in Paradyne's initial public offering and follow-on offering (collectively, the "Paradyne Offerings"). The complaint alleges that, in connection with the Paradyne Offerings, the Underwriter Defendants charged excessive commissions, inflated transaction fees not disclosed in the applicable registration statements and allocated shares of the Paradyne Offerings to favored customers in exchange for purported promises by such customers to purchase additional shares in the aftermarket, thereby allegedly inflating the market price for the Paradyne Offerings. The complaint seeks damages in an unspecified amount for the purported class for the losses suffered during the class period. This action has been consolidated with hundreds of other securities class actions commenced against more than 300 companies (collectively, the "Issuer Defendants") and approximately 40 investment banks in which the plaintiffs make substantially similar allegations as those made against Paradyne with respect to the initial public offerings and/or follow-on offerings at issue in those other cases. All of these actions have been consolidated before Judge Shira Scheindlin under the caption *In re: Initial Public Offering Securities Litigation* (the "IPO Actions").

In 2003, the Issuer Defendants participated in a global settlement among the plaintiffs and the insurance companies that provided directors' and officers' insurance coverage to the Issuer Defendants (the "Issuer Settlement"). The Issuer Settlement agreements provided for the Issuer Defendants (including Paradyne) to be fully released and dismissed from the IPO Actions. Under the terms of the Issuer Settlement agreements, Paradyne would not have been required to make any cash payment to the plaintiffs. Although the District Court preliminarily approved the Issuer Settlement, the preliminary approval remained subject to a future final settlement order, after notice of settlement had been provided to class members and they had been afforded the opportunity to oppose or opt out of the settlement. However, before the District Court could conduct its final settlement hearing, on December 5, 2006, the United States Court of Appeals for the Second Circuit (the "Second

Circuit”) reversed an October 13, 2004 order of the District Court in which Judge Scheindlin had granted class certification for six “test cases” in the IPO Actions. On April 4, 2007, the Second Circuit denied the plaintiffs’ petition for rehearing of the December 5, 2006 ruling. The District Court has since made clear that the Issuer Settlement cannot be approved — in its current form — as a class action settlement in light of the Second Circuit’s December 5, 2006 ruling and has declined to schedule a final approval hearing with respect to the Issuer Settlement for that reason. Counsel for the plaintiffs, for the Issuer Defendants and for the insurance companies that provided directors’ and officers’ insurance to the Issuer Defendants are currently engaged in discussions to restructure and salvage the Issuer Settlement. There can be no assurance that a restructured Issuer Settlement will be reached by the parties or that any such future settlement will meet the conditions for final approval by the District Court.

Other Matters

The Company is subject to other legal proceedings, claims and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, the Company does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its consolidated financial position or results of operations. However, litigation is subject to inherent uncertainties, and unfavorable rulings could occur. If an unfavorable ruling were to occur, there exists the possibility of a material adverse impact on the results of operations of the period in which the ruling occurs, or future periods.

(12) Employee Benefit Plan

The Company maintains a 401(k) plan for its employees whereby eligible employees may contribute up to a specified percentage of their earnings, on a pretax basis, subject to the maximum amount permitted by the Internal Revenue Code. Under the 401(k) plan, the Company may make discretionary contributions. The Company made no discretionary contributions to the plan during the three years ended December 31, 2007.

Through the acquisition of Paradyne in September 2005, the Company assumed the Paradyne Corporation Retirement Savings Plan 401K Plan. In December 2005, the plan was amended thereby freezing all future contributions and eliminating any Company contributions. In March 2006, the plan’s assets were merged into the Zhone Technologies, Inc. 401(k) Plan.

Through the acquisition of Sorrento in July 2004, the Company assumed the Sorrento Networks Corporation Retirement Savings 401(k) plan and the LuxN, Inc. 401(k) Profit Sharing Plan. Both plans were terminated on June 30, 2004 prior to the acquisition. The Sorrento Networks Corporation Retirement Savings 401(k) Plan’s assets have been distributed to all participants as of December 31, 2005. The LuxN, Inc. 401(k) Profit Sharing Plan’s assets were distributed to Penchecks, Inc. and Penchecks, Inc. is currently in the process of distributing all assets to participants.

(13) Enterprise Wide Information

The Company designs, develops and markets communications products for network service providers. The Company derives substantially all of its revenues from the sales of the Zhone product family. The Company's chief operating decision maker is the Company's Chief Executive Officer. The Chief Executive Officer reviews financial information presented on a consolidated basis accompanied by disaggregated information about revenues by geographic region for purposes of making operating decisions and assessing financial performance. The Company has determined that it has operated within one discrete reportable business segment since inception. The following summarizes required disclosures about geographic concentrations and revenue by product family (in thousands).

	Year ended December 31,		
	2007	2006	2005
Revenue by Geography:			
United States	\$ 79,453	\$105,098	\$ 86,919
Canada	10,497	10,611	12,547
Total North America	89,950	115,709	99,466
Latin America	37,808	25,154	8,661
Europe, Middle East, Africa	42,208	45,441	37,528
Asia Pacific	5,482	8,040	6,173
Total International	85,498	78,635	52,362
	<u>\$175,448</u>	<u>\$194,344</u>	<u>\$151,828</u>
	Year ended December 31,		
	2007	2006	2005
Revenue by Product Family:			
SLMS	\$123,183	\$118,209	\$ 66,854
Legacy, service, and other	52,265	76,135	84,974
	<u>\$175,448</u>	<u>\$194,344</u>	<u>\$151,828</u>

(14) Subsequent Event

On January 16, 2008, the Company sold its legacy GigaMux product line to a third party. The sale of the GigaMux product line was not treated as a discontinued operation since it did not represent a component of the Company that had operations and cash flows that were clearly distinguishable, operationally and for financial reporting purposes, from the rest of the entity. The Company expects to recognize a gain on the sale of the inventory, fixed assets, and intangible assets related to this product line in the first quarter of 2008.

(15) Quarterly Information (unaudited)

	Year ended December 31, 2007			
	Q1	Q2	Q3	Q4
	(in thousands, except per share data)			
Net revenue	\$ 43,146	\$ 44,085	\$ 41,604	\$ 46,613
Gross profit	15,539	14,976	12,471	16,092
Gain on sale of intangible assets	—	—	(5,000)	—
Operating loss (a)	(4,569)	(4,403)	(1,389)	(984)
Net loss	(4,786)	(4,554)	(1,530)	(1,232)
Basic and diluted net loss per share	\$ (.03)	\$ (.03)	\$ (.01)	\$ (.01)
Weighted-average shares outstanding used to compute basic and diluted net loss per share	149,338	149,533	149,715	149,907
	Year ended December 31, 2006			
	Q1	Q2	Q3	Q4
	(in thousands, except per share data)			
Net revenue	\$ 52,686	\$ 54,214	\$ 43,138	\$ 44,306
Gross profit	19,861	11,688	15,109	15,937
Amortization and impairment	1,898	559	113,973	—
Operating loss (b)	(3,750)	(12,999)	(121,144)	(4,302)
Net loss	(3,904)	(13,100)	(121,032)	(4,630)
Basic and diluted net loss per share	\$ (0.03)	\$ (0.09)	\$ (0.81)	\$ (0.03)
Weighted-average shares outstanding used to compute basic and diluted net loss per share	148,139	148,721	148,905	149,142

- (a) Operating loss included a \$5.0 million gain on sale of patents during the third quarter ended September 30, 2007.
- (b) Operating loss included a \$7.2 million write off of inventory related to legacy products during the second quarter ended June 30, 2006 and an impairment charge of \$113.7 million related to goodwill and intangibles during the third quarter ended September 30, 2006.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
Zhone Technologies, Inc.:

We have audited the accompanying consolidated balance sheets of Zhone Technologies, Inc. and subsidiaries (“the Company”) as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders’ equity and cash flows for each of the years in the three-year period ended December 31, 2007. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Zhone Technologies, Inc. and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, the Company adopted SFAS No. 123(R), *Share-Based Payment*, applying the modified prospective method at the beginning of fiscal year 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Zhone Technologies, Inc.’s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 6, 2008 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
Zhone Technologies, Inc.:

We have audited Zhone Technologies, Inc.'s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Zhone Technologies, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Zhone Technologies, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Zhone Technologies, Inc. and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2007, and our report dated March 6, 2008 expressed an unqualified opinion on those consolidated financial statements.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2007, the end of our fiscal year. In making this assessment, management used the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in the report entitled "Internal Control-Integrated Framework." Based on our assessment of internal control over financial reporting, management has concluded that, as of December 31, 2007, our internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with generally accepted accounting principles. Our independent registered public accounting firm, KPMG LLP, has issued an attestation report on our internal control over financial reporting. Such report appears at page 63.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.
