

CLOUDMESH HYBRID GATEWAY

NL19MESH

Bring the new adaptive Wi-Fi experience to your home with the **CloudMesh Hybrid Gateway**

MESH ENABLED

The **CloudMesh Hybrid Gateway (NL19MESH)** works wirelessly with the **CloudMesh Satellite (NS-02)**, forming a single powerful Whole Home Wi-Fi Mesh network with all the control and settings centralised on the gateway. The gateway becomes the Wi-Fi Mesh master node and the Wi-Fi client device roams seamlessly between satellites and the gateway.

Wi-Fi AUTOPILOT

Every **Hybrid CloudMesh Gateway** includes the **CloudMesh Wi-Fi Autopilot**.

Wi-Fi Autopilot constantly scans and analyses the end-user Wi-Fi environment. If any detrimental changes are detected, the Autopilot adjusts the gateway's Wi-Fi parameters. Any action taken is based on a patented and weighted algorithm ensuring that the internet connection experience is not compromised. It ensures that every Wi-Fi client device is connected on the best possible channel, using the fastest available band, at the perfect RF power level and at the closest Wi-Fi access point.

EASY PAIRING WITH CLOUDMESH SATELLITES

The **CloudMesh** system is a turnkey, out-of-the-box solution. ISP Satellite pre-provisioning is available via a cloud portal and API, allowing for a **Zero Touch** configuration experience for the end-user. There is also an easy and fast alternative for in home setup using **WPS** buttons.

KEY FEATURES CONT.

WORKS WITH Wi-Fi ANALYTICS PLATFORM

The **CloudMesh Wi-Fi Analytics Platform** is a turnkey, CPE integrated, cost-effective solution that provides the ultimate visibility into the health of the subscriber's Wi-Fi home network.

It can dramatically lower operational costs and create superior end-user experiences. It does this by enabling proactive diagnostic, management and control of a subscriber's home Wi-Fi environment, helping to resolve even the most elusive Wi-Fi problems.

4G FALLBACK CONNECTIVITY

Benefit from hybrid technology to achieve an uninterrupted broadband experience from the very start. Equipped with a **4G LTE category 6** module, the **CloudMesh Hybrid Gateway** will connect to the mobile network allowing:

4G mobile fallback connectivity

If the fixed line service is interrupted the gateway will automatically switch to the **4G mobile network**. It will switch back to the fixed line service when that service resumes, guaranteeing continuity.

Faster internet connection

The **CloudMesh Hybrid Gateway** enables superfast internet access before the fixed line service is even activated, allowing end users to connect faster, without any waiting period.

MADE FOR NBN AND UFB

Featuring a **Gigabit WAN port** as well as **VDSL2/ADSL2** technologies, the **CloudMesh Hybrid Gateway** will connect with **FTTN, FTTB, FTTC** and **FTTH**. The Gateway also features **VoIP** for HD quality voice calls with the capacity to connect two (2) phones.

CLOUD ORCHESTRATION

To operate effectively, multiple Wi-Fi access points within the same environment need a centralized point of coordination and control. This is done by the **Wi-Fi Analytics Cloud**.

In addition to that, the Cloud is performing all the CPU intensive processing and is using sophisticated machine learning techniques to detect and recognize historical Wi-Fi environment patterns to avoid future Wi-Fi interference.

PRODUCT INTERFACES

PERFECT FOR

- › ISPs who want to reduce number of Wi-Fi related support calls by using the self-adapting Wi-Fi Technology on the CPE gateway.
- › ISPs who want end-to-end connection visibility and control using the Wi-Fi Analytics Platform.
- › End-Users who want to seamlessly expand their Wi-Fi network with CloudMesh Satellites.

FEATURES AT A GLANCE

- › Mesh Enabled for seamless connection to CloudMesh Satellites
- › Automated Wi-Fi issue resolution with Wi-Fi Autopilot
- › Gigabit connection to NBN and UFB fibre networks
- › 4G backup connection if fixed line goes down
- › Support for VDSL2/ ADSL2+ and Voice
- › Wi-Fi visibility and assurance with the Wi-Fi Analytics Platform

WHAT'S IN THE BOX

1 x NL19MESH
CloudMesh Hybrid Gateway

1 x Power Adapter

1 x Ethernet Cable
(1.5m, RJ45)

1 x Telephone Cable
(1.5m, RJ11)

1 x Wi-Fi Security Card

1 x Quick Start Guide

2 x LTE antennas

TECHNICAL SPECIFICATIONS

ENVIRONMENTAL AND PHYSICAL

- › Operating temperature: 0-40°C
- › Humidity: 10%-95% non-condensing
- › Storage temperature: -10-60°C
- › Humidity: 5%-95% non-condensing
- › DC Input Voltage: 12V/2A
- › Dimensions: 230 (w) x 200 (h) x 75 (d) mm
- › Weight: 558g

DEVICE INTERFACE

- › 1 x RJ45 10/100/1000Mbps WAN port
- › 1 x ADSL / VDSL port
- › 4 x RJ45 10/100/1000Mbps LAN ports
- › 2 x RJ11 Phone ports (VoIP)
- › 1 x Reset button
- › 2 x WPS buttons (2.4GHz and 5GHz)
- › 1 x Power jack
- › 2 x USB 2.0 Ports (storage)
- › 1 x Power switch
- › LED (Power/DSL/Internet/WAN/LAN1-4/ 2.4GHz/5GHz/WPS/USB1-2/ Phone1-2)

VDSL

- › PPPoE/PPPoA/IPoA/ Static IP/ Dynamic IP/Bridge
- › ITU-T G.993.2 VDSL2
- › Supports 8a,8b,12a,12b,17a profile
- › Supports ATM and PTM
- › Supports G.INP

ADSL2+

- › PPPoE/PPPoA/IPoA/Static IP/ Dynamic IP/Bridge
- › ITU G.992.1 (G.dmt)
- › ITU G.992.2 (G.lite)
- › ITU G.992.3
- › ITU G.992.3 (Annex J)
- › ITU G.992.3 (Annex L)
- › ITU G.992.5
- › ITU G.992.5 (Annex M)
- › Supports multiple PVCs

ETHERNET WAN

- › PPPoE, DHCP client, Static IP

WIRELESS

- › Compatible with IEEE 802.11b, IEEE 802.11g, IEEE 802.11n and IEEE 802.11ac
- › Supports concurrent dual band (2.4GHz/5GHz) wireless
- › SSID broadcast or in stealth mode
- › Auto/Manual Channel selection
- › WEP/WPA/WPA-PSK/WPA2/WPA2-PSK
- › WPS button (Wi-Fi Protected Setup)

VOIP PROTOCOL

- › SIP2.0
- › G.711, G.723 and G.726
- › FAX T.38 FAX Relay

MEDIA

- › File sharing
- › DLNA

SECURITY

- › Firewall
- › MAC filtering

ROUTING

- › Static Route
- › Dynamic Route (RIP v1/v2)
- › DMZ
- › Supports Layer 2 Bridge Mode

ADMINISTRATION

- › QoS
- › SNMP
- › UPnP
- › Syslog
- › Web-based UI
- › Remote Login
- › TR-069 Auto provisioning
- › Backup/Restore Settings

COMPLIANCE

- › RCM, NZ Telepermit
